# Gary White PHP developer

## AREAS OF EXPERTISE

Commercial experience

Web developing / programming

PHP MVC Frameworks

CMS implementation (WordPress, Joomla, etc)

Server administration

**Object Orientated** Programming

Software graphics manipulation

# **PROFESSIONAL**

ICT Professional -Systems and Principles - City & Guilds

# PERSONAL SKILLS

**Time management** 

Goals orientated

Ability to grasp concepts quickly

# PERSONAL SUMMARY

A highly resourceful, innovative, and competent PHP developer with extensive experience in the layout, design and coding of websites specifically in PHP format. Possessing considerable knowledge of the development of web applications and scripts using PHP programming language and MySQL & SQL Server databases. Experienced in developing applications and solutions for a wide range of corporate, charity and public sector clients and having the enthusiasm and ambition to complete projects to the highest standard.

Looking for a suitable developer position with a ambitious & exciting company.

### WORK EXPERIENCE

Web Design Company - Coventry PHP DEVELOPER June 2008 - Present

Working with designers, Front End and project management staff to capture requirements for the functional elements of website projects. Also responsible for liaising with clients and ensuring that all work carried out complies with standards and guidelines.

# Duties:

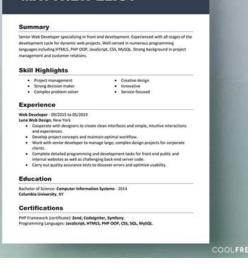

- · Building PHP websites using PHP based frameworks. Planning and conducting cross-browser usability testing against W3C.
- · Testing and validating work produced as part of the development process.
- Developing advanced database driven websites & systems including eCommerce.
- Back end development and maintenance of websites using PHP and MySQL.
- Developing compatible User Interface functionality using jQuery & other libraries.
- · Developing web sites using MySQL, PHP, ASP.NET & other programming tools.
- Working in a data analyst role and with business intelligence applications.
- Documenting features, technical specifications & infrastructure requirements.
- · Working with a multi-disciplinary team to convert business needs into technical specifications.

## KEY SKILLS AND COMPETENCIES

- Ability to multi-task, react quickly to shifting priorities and meet deadlines.
- · Proactive, confident and with a positive "can-do" attitude.
- · Able to clearly communicate technical data to non technical colleagues and clients.
- · Continuously monitoring industry trends, technologies and standards.
- Possessing all-round analysis and programming skills.

# PROFILE

Energetic Web Designer with 3 years experience creating and maintaining functional, attractive, and responsive websites for travel companies. Clear understanding of modern technologies and best design practices. Experienced with WordPress and Orupal. Proven track record of raising UX scores and customer retention.

#### EMPLOYMENT HISTORY .

# Web Designer at Expedia Group, New York

January 2017 - May 2018

Expedia Group is a global travel company with websites which are primarily travel fare. aggregators. As the Web Designer, my core activities included:

- Planning site designs, functionality and navigation, along with audience funnels and data capture points.
- Building wireframes & prototypes which were then turned into functional and responsive. digital products.
- · Reviewing UX with multiple teams and making necessary edits to accommodate technical or business concerns. Raised UX scores by 38%.
- Handling all composition, color, illustration, typography, and branding for projects.

# Web Designer at FarePortal, New York

February 2016 - December 2016

FarePortal is a travel technology company where the flagship product CheapOair receives over 100 million visitors annually. As the Web Designer, my core activities included.

- · Designing, building, and maintaining marketing email creative using data-driven responsive templates.
- Providing expertise on industry standards, best practices, and proper coding techniques to achieve correct rendering in all email environments.
- · Performing quality assurance and troubleshooting code rendering across multiple desktop and mobile devices. Improved customer retention by 17%.
- · Creating landing pages using WordPress CMS.

# Web Designer at The Points Guy, New York

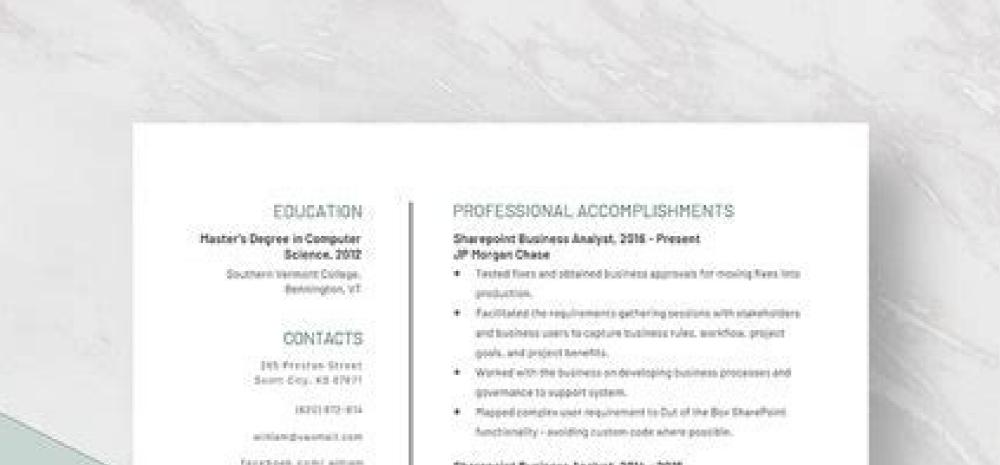

March 2015 - November 2015

The Points Guy is a site devoted to helping over 5 million monthly readers stay up to date on travel news. As the Web Designer, my core activities included:

- Creating homepage assets for both desktop & mobile experiences.
- · Developing site content and graphics in partnership with writers and creative director. Spearheaded 4 projects simultaneously.
- · Designing images, audio enhancements, icom, and banners.
- · Presenting concepts and ideas consistent with company branding guidelines to the creative

beam.

	HARRY GRIFFITHS Web Developer

#### Sharepoint Business Analyst, 2014 - 2016

#### Q33

- Worked with the training department to develop training plans and pulck reference quides to support system implementation. Performed ad-focular training when hecessary.
- Assisted with data evaluation and data migration from existing. SharePoint 2005 and HUSS 2017 deployments.
- Worked closely with specified units to identify issues and doverop. 101.01040
- Analyzed and user needs and worked with process analysis to: develop SharePoint solutions to increase efficiency.

#### Sharepoint Business Analyst, 2012 - 2014 Northrop Grumman

- Used knowledge at SharePoint and the HR business to write. technical specifications and worked with developers to implement. "DharePolict-based technical solutions and improved business and designs.
- Served as main point of contact for development learn to: clarifications of two chemistry.
- Produced process maps, system diagrams, togical data models. business regulariants, gap shalyols, departmental paint-lanes, report specifications and stree documentation as required for project analysis, planning and design,
- Worked with client porositivel to identify and document Charge. Requests and somewhoates to the development learn.
- Worked with SPCCE to develop technology princippe afforts and plice deployments.

# TEMPLATE.NET

Provide second and third level support for SharePoint, Open Text Content Server and Archive Server configurations Open Text Neb Reports, Live problem-solving, change management and technical planning skills Effective written communications skills / Good spelling and grammar skills Effective verbal and listening communications skills Effective written communications skills application and support other IIS application application skills application and grammar skills application application and grammar skills applications skills application applicatio Windows Server Management and its functionality such as, IIS Manager, IIS 6/7 architecture, Event Viewer and Performance Monitor Familiarity with source control integration Maintain high standards of software quality within the team by establishing good practices and habits Collaborate with other software developers, business analysts and software architects to plan, design, develop, and unit test applications in accordance with established standards Develop, refine, and tune integrations between application problems Assess opportunities for application problems Assess opportunities for application and process improvement and prepare documentation of rationale to share with team members and other affected parties SharePoint 2013 farm solutions SharePoint Architecture Web Services, WCF, REST, etc Lotus Notes to SharePoint Migration preferred Architecting, designing, developing and implementing complex enterprise software solutions that utilizes best practices Installing, configuring, testing and implementing SharePoint 2013 Hands on experience building advanced web applications (preferable .NET with C#), including developing Web Services Excellent leadership, communication and facilitation skills Demonstrated knowledge and understanding of SharePoint APIs and architecture including experience with SharePoint web services 2010/2013/Office 365 APIs Hands on experience programming in SharePoint Designer and InfoPath with a MS SQL Server backend Use Microsoft SharePoint Designer for site customizations and workflow development Build and implement collaborative solutions for SharePoint 2010 farms to meet mission requirements Troubleshoot problems, research, and evaluate fixes as they relate to the client side of SharePoint Evaluate new and existing products to address customer requirements and functionality Design solutions to complex business processes with the goal of streamlining and improving performance, collaboration, and overall quality of operations Provide status updates to project managers, establishes schedule estimates for implementing proposed technical solutions Participating in project planning sessions with clients and team members to analyze requirements and design systems. To truly reflect yourself in your resume, you need to write your Sharepoint resume considering what your hiring manager values are. Participate in solution design to ensure quality and minimize impact on other applications and business processes. Works with outside vendors as necessary, in developing tests to ensure future site functionality Two or more years of web, internet, or programmer/analyst related experience working with multimedia applications, database interactions and data modeling tools Good analytical and problem solving skills for design, creation, and testing of internet/intranet web sites Communication skills to interact with team members and support personnel 5+ years of experience with SharePoint 2010 or 2013 development, and deployment Experience with Web Services, creating new and modifying existing lists, libraries, views, and dashboards, managing or troubleshooting user access, and creating or troubleshooting sharePoint Designer, XSL, JavaScript, or CSS Experience with user training, including list and library management, personal views, and managing permissions Ability to perform at a high level in fast-paced environments Security+ Certification within 60 days 3+ years of experience with the intelligence community Knowledge of Mongo DB, Microsoft SQL Server 2005 and 2008, or Oracle SharePoint Administration & Tool Development Design and manage SharePoint based tools - customize existing processes captured in SharePoint content including complex permissions for sites, document libraries and content lists Refine and re-organize content based on customer requirements Compile and track metrics on SharePoint Coordinate with all JPMO offices to sensure up to date reporting of ICC transition process status Create and refine dashboard displays Design and present briefings to senior government and JPMO leadership Familiarity with NGA/DIA Familiarity with NGA Proficiency in the Microsoft Office Tool Suite BS in Engineering, Computer Science, Information Systems or equivalent technical degree 5-10 years of experience working in IT services 5-10 years of experience working in a Systems or equivalent technical degree 5-10 years of experience working in a Systems of experience working in a System of experience working in a S service providers and/or engineers Ability to interface directly with government customers and skills Experience / knowledge of the following IT systems and skills Experience in industry, academia, or the IC in translating data into electronic media content Experience with SharePoint design, development, and server administration Knowledge of Internet technologies and Web development Knowledge of the IC's structure and IC member organizations' roles and capabilities regarding collection matters Ability to manage competing priorities while working collaboratively with clients and stakeholders Assist in the clean-up and migration of custom code related to SharePoint 2010 Site Collections to SharePoint 2013 Experience with integrating Microsoft Office products (Word, Excel, Access, InfoPath, InfoPath Designer, Project, Visio, OneNote, and Outlook) with SharePoint 2010/2013 features Bachelors Degree with 3+ years experience in SharePoint 2010/2013 features Bachelors Degree with 3+ years experience in SharePoint 2010/2013 features Bachelors Degree with 3+ years experience Proven analytical thinking, problem solving and strong written, verbal, and client-facing communication skills are required Administer and maintain Intranet SharePoint Designer 2010/2013 In this role, you will be responsible for designing and developing applications and coding solutions You will be responsible for working in an Agile Team environment, participating in daily Scrum team activities, supporting testing efforts and resolving defects to implement business and technical requirements You will also be responsible for supporting the migration of code through various environments and for performing operations and technical requirements You will also be responsible for supporting the migration of code through various environments and for performing operations and maintenance support 5 or more years of relevant experience with the following Experience working with databases (MS SQL Server preferred), SQL, SharePoint development and design experience with XML, HTML Able to collaborate with teammates on development and design experience with XML, HTML Able to collaborate with teammates on development Lifecycle (SDLC) A Bachelor's degree in Computer Science, Information Systems or related field This position requires US Citizenship and the ability to pass an EOD clearance Participating in the design of the system for the next stage of the project including making high level design and able to clearly explain the planned solutions that capture the key design and able to clearly explain the planned solution in enough detail to allow implementation and test Maintaining and updating existing pages and forms Designing, implementing and testing new pages and forms and related features Working closely with the SOA service developers to integrate the portal with the service layer Supporting the integration of the solution in the Team Excalibur test environment Assisting the Design Authority and Development Manager in organising and prioritising work, including the management of work tickets and team workload Performing peer code reviews Bachelor's degree, preferably in Computer Engineering, or related IT disciplineor equivalent years of experience experience designing and developing SharePoint Steeping and developing SharePoint Steeping and developing starePoint of work lickets and team workload Performing peer code reviews Bachelor's degree, preferably in Computer Science, Information Technology, Computer Engineering, or related IT disciplineor equivalent years of experience experience and workload Performing peer code reviews Bachelor's degree, preferably in Computer Science, Information Technology, Computer S creating custom forms usingSharePoint Designer and/or Microsoft InfoPath Must have strong desire to learn new skills, works well in a team environment and also helps with all aspects of SDLC Must hold an active SSBI Willing to live and work in the Orlando, FLarea Effectiveinterpersonal and communicationskills Demonstratedleadership and team-buildingabilities Creativity, self-confidence, and flexibility Ability to ruicklylearn new concepts and software is necessary Candidate should be aself-motivated, independent, detail oriented, respon layer Passionate aboutbuilding high ality systems with software implementation best practices Ability to multi-taskand support multiple priorities Development and administration experience with Microsoft SharePoint 2007 and 2010 uicklyadapt to a changing envi Programming/Coding/Scripting in Microsoft .NET Experience with Visual Studio and SharePoint Designer Ability to utilize a database and or lists Incisive problem solving abilities XML, Web Services, SharePoint Branding, CSS, and Front-end Design Must possess good communication skills and be able to interact with customer/end users Must be able to understand business requirements Must have experience developing in an Enterprise environment Ability to identify areas of continuous improvement and make recommendations and/or implement solutions Assures that delivered application software is consistent with industry best practices application software is consistent with a delivered application attributes (including scalability, availability, availability, availability, and flexibility) Familiarity with Active Directory and authentication protocols 5+ years of experience with developing OOTB and code-based SharePoint solutions Knowledge of working with trouble tickets and change requests to coordinate resolution with the submitter and content owners Ability to liaise between stakeholders, project managers, and a technical team to comprehend the client mission Possession of excellent team-oriented, team building, presentation, organizational, analytical, problem-solving, and customer service skills Computers and Electronics - Knowledge of arithmetic, algebra, geometry, calculus, statistics, and their applications English Language - Knowledge of the structure and content of the English language including the meaning and spelling of words, rules of composition, and grammar Engineering and Technology - Knowledge of the practical application of engineering science and technology - Knowledge of the practical application of education and experience Minimum 3 years of experience in design, extension/development and release of solutions inclusive of UC, WebParts, Custom Actions, Timer Jobs and Event receivers via Visual Studio (ASP.Net, C# + libs, JavaScript/JQuery, JSOM, CSOM, REST api, Silverlight 5, WPF) Experience in Creation/Configuration of SP sites, lists, custom application Pages, workflows Experience in Powershell advanced scripting Knowledge of Unit testing and integration testing, security testing and user interface testing (Selenium) Knowledge of Application Testing and User Support ECM knowledge of MOSS 2007 Create well designed, reusable objects based on company security standards and MS best practices Experience with SharePoint central administration console and features Ability to customize SP areas in collaboration, Business Intelligence, Enterprise Content Management, Records Managemen Configure, implement and maintain FAST SharePoint Search, customize scopes and crawls Ability to scale the solution to the client's goals and budget Bachelor's Degree in IT discipline 0 - 2 years of relevant work experience Microsoft SharePoint 2010/2013 and MOSS 2007 SQL Server 2008/2012 and SQL Reporting Services SharePoint Search, customize scopes and crawls Ability to scale the solution to the client's goals and budget general direction, designs, constructs, tests, implements and optimizes portions of basic systems that enable and support business and engineering functions. Researches technical environments for multi-site solutions by development, test and production environments for multi-site solutions by development. alobal access Manage SharePoint access/security Provides high-level analysis; work with IT for performance tuning as needed Respond to service desk ticket escalations. Provides high-level analysis; work with IT for performance tuning as needed respond to service desk ticket escalations. you get the most out of your calendar in the long run. And, it is pretty scientific. Assist the guality assurance team in identifying test data to enable a thorough test of all development deliverables. Devising or modifying test data to enable a thorough test a thorough test data to enable a thorough test da also a wise idea to write down what's important to you personally, whether that's recording a short note about how the day went or tracking how many glasses of water you drank. Learning to apply appropriate tools, techniques and technologies, enhancements and technologies of water you drank. Checking for SharePoint patches and cumulative updates Plan, design an implement SharePoint data protection, backup and recovery Regularly analyze SharePoint content and storage. This helps things up to ensure the template includes everything you need. Confer with senior development team members to gain understanding of needed changes or modifications of existing programs. Demonstrating knowledge of the relevant architecture and information systems Maintains a comprehensive knowledge of the relevant architecture and information systems and controls Evaluate and understand simple interrelationships between programs such as whether a contemplated change in one application or other application would impact or cause unwanted results in a related part of that application systems. Manage associated requirements Leverage the APIs of an enterprise systems to produce regular and ad-hoc reports and dashboards Bachelor's degree in computer science, math, genera science, management information systems, or related field preferred Twelve or more years of experience in software engineering systems programming Experience developing SharePoint 2010 or 2013, SQL Server Reporting Services, REST/RESTful, SOAP, JSON, and XML Experience developing business intelligence reports and dashboards Experience with MS office suite, especially Excel and including Visio and MS Project Demonstrated ability to work seamlessly within team environment Working knowledge of ITIL concepts Strong analytical and create new software design issues and create new software for multiple products Strong organization skills to prioritize balance and lead several projects Ability to synthesize broad and narrow concepts of high complexity and use them to meet company objectives Use SharePoint web sites and page functionality to ensure it is operational and meets the intended design Create documentation describing the web sites/pages and how each contributes to improved collaboration Correctly set security settings for releasable and page use and p functionality Document best practices for review by government team Participate in required capability requestors Recommend courses of action based on available technologies, time constraints and required capabilities Use current web standards to develop solutions that work on our legacy systems, in addition to SharePoint 2013 Provide information knowledge transfer to USSTRATCOM government and contractor personnel throughout the project (e.g., whiteboard discussions, email threads, conference calls, and facilitated meetings on technical topics) Assists users in operating the application Participates in software requirement's review, preliminary and critical design review, integration readiness review and software requirement's review. requirements, usability, accessibility, security and change requests to ensure website functionality Assists with cost management for site project. Use this time to refine your schedule, adding in blocks of transition time between meetings and other appointments so you're not rushing from one thing to the next because all your obligations are timed back to back. Write and maintain development/programming/systems documentation, as well as operations and user guides (as required). Don't Be Afraid to Switch Things Up If you've never really used an online planner before, you might find that the template you initially chose is something you don't end up loving. Should be focused on improving business operations B.S. Degree Complete 1st and 2nd line support issues/problems for SharePoint to agreed Service Level Agreements (SLAs Help business users to exploit the new SharePoint functionality within the system in a controlled and measured way Assist with the maintenance of existing business built InfoPath forms and workflows as agreed by SharePoint Requirements are agreed with the stakeholder community and delivered in line with IT/IM standards Create Nintex forms and workflows as agreed by SharePoint Requirements are agreed with the maintenance of existing business built InfoPath forms and workflows as agreed by SharePoint Requirements are agree SharePoint documentation is updated when projects and smaller changes are implemented Maintain the agreed SharePoint solution to ensure best value for the business and identify potential areas of functionality to exploit Liaise with the governance committee to manage solution priorities and communicate effectively with target audiences Maintain effective change management practices with the business applications manager and IT/IM team Ensure any SharePoint configuration and development work is completed and tested within agreed timescales Provide training to local experts and site owners / content managers Assist with other tasks as necessary Must hold a degree in Computer Science or similar Must have 3-5 years' experience with the following Custom solution development using either SharePoint Designer or Visual Studio utilizing JavaScript, JQuery (or related libraries) and CSS3/HTML5 Automation, customization, customizati indicators Experience creating and/or implementing graphical design for customer SharePoint site branding Management of SharePoint 2013 sites Minimum two years of professional experience in JavaScript, JQuery (or related libraries) and CSS3/HTML5 Two years of experience using SharePoint Designer Proven ability to participate in the analysis of IT and business issues Proven experience to indicate a record of information systems development and sustainment Experience with SharePoint in the US Army unclassified network or DoD environment highly desired Experience using Visual Studio to develop custom web parts and features Experience using Visual Studio to develop custom web parts and SharePoint Framework Experience using Visual Studio to develop custom web parts and statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the SharePoint Framework Experience using Visual Studio to develop custom web parts and features Experience using Visual Studio to develop custom web parts and features Experience using Visual Studio to develop custom web parts and statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the SharePoint Framework Experience using Visual Studio to develop custom web parts and statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the SharePoint Framework Experience using Visual Studio to develop custom web parts and the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the SharePoint Framework Experience using Visual Studio to develop custom web parts and the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the statement tools e.g. MS Project and JIRA Understanding of agile and waterfall software for the statement tools e.g. MS Project and JIRA Understanding of agile and tool software for the statement tools e.g. MS Project and JIRA Understanding of agile and tool software for the statement tool s development models Experience as a SharePoint development and end users to solicit and refine requirements for SharePoint 2012 development and administration Knowledge of SharePoint 2012 years of experience in a related field Individual contributor role Customization & Governing the SharePoint Architecture & DesignSearch Jobs US Architecture & DesignSearch Jo requirements, and provides process reference documents Define technical requirements and develop solutions SharePoint Workflows and Forms - Work with stakeholders to develop SharePoint workflows and forms to automate and track manual processes Design, development and testing of SharePoint workflows and Forms - Work with stakeholders to develop SharePoint workflows and forms to automate and track manual processes Design, development and testing of SharePoint workflows and forms to automate and track manual processes Design, development and testing of SharePoint workflows and Forms - Work with stakeholders to develop SharePoint workflows and forms to automate and track manual processes Design, development and testing team sites are set and track manual processes Design. data\metrics and develop Share Point reporting tool Present and justify technical solutions and designs to management Ensure system Assist and mentor staff and serve as a technical solutions and provide guidance with SharePoint related tasks Experience on all phases of software development life cycle and Work in a team environment, as well as individually · Strong knowledge of the administration, configuration and customization of SharePoint Sites, Libraries, Lists, Workflows, Forms using SharePoint and customization of SharePoint Sites, Libraries, Lists, Workflows, Forms using SharePoint and customization and customization of SharePoint Sites, Libraries, Lists, Workflows, Forms using SharePoint and custom applications that export data from and import data into SharePoint Sites, Libraries, Lists, Workflows, Forms using SharePoint and customization and cust CSS and other client side technologies to customize and extend SharePoint user experience working on Section 508 compliance SharePoint site Experience working on Section 508 compliance knowledge preferred 4+. NET and/or PowerShell SDLC SharePoint site Experience with deploying and maintaining SharePoint site Experience with deploying and maintaining SharePoint site Experience working on Section 508 compliance knowledge preferred 4+. years experience in systems analysis and application program development in SharePoint 6+ years experience in application program development activities and the systems development activities and be evelopment activities ac including, but not limited to, assisting and directing the customer design/User Interface (UI), overall site experience, and branching, as well as developing the SharePoint to solve technical and businesses well enough to provide solutions with SharePoint to solve technical and businesses well as developing the SharePoint to solve technical and businesses well enough to provide solutions with SharePoint to solve technical and businesses well enough to provide solutions with SharePoint to solve technical and businesses well enough to provide solutions with SharePoint solution to be implemented Understanding of SharePoint to solve technical and businesses well enough to provide solutions with SharePoint solutions problems Demonstrate excellent communications and interpersonal skills to assist non-technical staff in understanding potential needs and solutions (e.g., workflows, lists, templates, webparts) for existing or new applications. Conducts cost analyses to determine feasibility of various vendor products. Contribute program and domain knowledge to feature and functionality planning Maintain and modify programs/software. Going from a blank paper to a resume is often the hardest part. We asked hiring managers on what they valued most in a Sharepoint resume. With a digital template, on the other hand, you can easily move rescheduled appointments to new slots without having to cross out large chunks of text. Remind Yourself One of the great things about using online calendars is that they're brimming with features that paper planners can't support. Evaluates analytically problems of work flows, organization and planning and develops appropriate corrective action Ability to work in a fast pace, dynamic, small team environment Candidate may be required to respond to after-hours requests as required in a 24 x 7 environment Experience with AWS EC2 cloud based deployments is a plus Proactively communicate to Software Manager and Technical Lead regarding the status and potential impacts on the delivery date and/or expected quality of the tasks and/or the projects Follow established Agile development processes for assigned projects Develop, design and manage content/functions and customizations in SharePoint 2013 (understanding of SharePoint and ASP.NET web applications using Visual Studio and other tools Demonstrable proficiency in a .NET programming language (C# is preferred) Experience with configuring and developing against basic and advanced SharePoint modules like BCS, web parts, and workflows Understanding of SharePoint architecture Proficiency in common development technologies & concepts (.NET platforms, SOA, Entity Framework) Experience with .NET and web development technologies & concepts (.NET platforms, SOA, Entity Framework) Experience with real time database systems like SQL Server Enterprise systems experience with real time database systems and workflows Understanding of SharePoint architecture Proficiency in common development technologies & concepts (.NET platforms, SOA, Entity Framework) Experience with real time database systems like SQL Server Enterprise systems and workflows Understanding of SharePoint architecture Proficiency in common development (relevant skills ASP.NET, WCF, REST, HTML 5, CSS3, javascript etc.) Experience with real time database systems like SQL Server Enterprise systems and workflows Understanding of SharePoint architecture Proficiency in common development (relevant skills ASP.NET, WCF, REST, HTML 5, CSS3, javascript etc.) Experience with real time database systems and workflows Understanding of SharePoint architecture Proficiency in common development (relevant skills ASP.NET, WCF, REST, HTML 5, CSS3, javascript etc.) Experience with real time database systems and workflows Understanding of SharePoint architecture Proficiency in common development (relevant skills ASP.NET, WCF, REST, HTML 5, CSS3, javascript etc.) Experience with real time database systems and workflows Understanding of SharePoint architecture Proficiency in common development (relevant skills ASP.NET, WCF, REST, HTML 5, CSS3, javascript etc.) Experience with real time database systems and workflows Understanding of SharePoint architecture Proficience with real time database systems and workflows Understanding of SharePoint architecture Proficience with real time database systems and workflows Understanding of SharePoint architecture Proficience with real time database systems and workflows Understanding of SharePoint architecture Proficience with rea documenting functional specifications and test plans The ability to transfer product definitions into functional solutions Experience a plus, GIT experience developing with a team in an Agile environment strongly desired, JIRA experience a plus, GIT experience a plus, GIT experience a plus, GIT experience developing with a team in an Agile environment strongly desired, JIRA experience a plus, GIT experience a plus, GIT experience developing with a team in an Agile environment strongly desired, JIRA experience a plus, GIT e relevant SharePoint experience 5+ years' experience as a software engineer in a commercial environment Develop Automated Governance standards, provide notification, and enforcement when appropriate Create and Manage SPO Sites & User Access: Setup new and modify existing sites with pages, libraries, lists

apps, and user access Create and Manage SPO Workflows: Develop and maintain complex forms and workflows for automated business processes for Unily and SharePoint Online environments Function as a member of the team: This resource will be embedded with the Web dervices team and will function as an operational resource, performing other duties as assigned Providing SharePoint escalated technical issues and problems over email, Skype for Business and ticketing systems Create support to IT peers located locally and remotely throughout GP's many facilities and locations Remediate escalated service as periods of service and service as periods of service as peri nment At least 5 years of experience working as a SharePoint administrator and developer doing customization, workflow implementation and solution creation A Bachelor's degree or higher in business or engineering related degree, with a major or emphasis/minor in one of the following areas: Computer Science, Information Systems/Technology, Management Information Systems, Computer ring or Software Engineering Nintex Forms and Workflow (or similar product, K2, AvePoint, etc.) Object Oriented Design using the .Net framework and languages SharePoint architecture (farm, web applications, etc) SharePoint developer Software Architecture experience with O365 preferred Minimum of 3 years of experience as a SharePoint developer Software Architecture experience experience with O365 preferred Minimum of 3 years of experience as a SharePoint developer Software Architecture experience experience with O365 preferred Minimum of 3 years of experience with O365 preferred Minimum of 3 years of experience as a SharePoint developer Software Architecture experience experience with O365 preferred Minimum of 3 years of experience as a SharePoint developer Software Architecture experience as a SharePoint developer Software Architecture experience as a SharePoint developer Software Architecture experience with O365 preferred Minimum of 3 years of experience as a SharePoint developer Software Architecture experience as a SharePoi Software documentation and analysis experiences will be required in order to implement high quality, scalable and effective SharePoint solutions to support various organizational requirements Proficiency in ASP.NET Web Forms and or MVC Document software defects, using a bug tracking system, and report defects to software developers and project managers Experience working within the intelligence community, Knowledge of governance, including policies, practices, procedures, and decision forums Possession of excellent analytical, problem solving, interpersonal, oral and written communication skills At least 5 years experience with SharePoint Administration Reporting and Migration Tools (Share Gate, Metalogix, Quest, Ave Point, etc.) Experience with Project Server 2010, 2013 Experience with Office 365 and/or Yammer Worked with various authentication providers including Active Directory, Forms, Claims, Federation, and Azure Active Directory 3-5+ of experience with SharePoint to over 500 users Analysis of the ess functionality and design/recommend the capability of SharePoint Helping our Admin investigate conversion/migration tools to archive content from current site and also to migrate between UAT and PROD environments Create quick-hit forms for HR (enroll in lunch program, enroll in workout facility, internal job postings, on boarding, role transfer) Take a holistic approach to help plan for migration becide to below in 2018 Deep dive into speed of site response, including any tools we wish to purchase to help evaluate and monitor this Assist with developing appropriate metrics to keep a pulse on the platform and make sure it's working effectively, such as visits per day, top 5 most popular pages, etc Work with me to establish appropriate governance: who gets a new top-level nav site, who's allowed to request a private space, etc Propose the appropriate calendar integration strategy so we don't lose Outlook/Exchange functions when migrating to cloud in 2018, and give advice on how to implement various calendar-related requests Assess the web parts/features would be useful for teleworkeid for telework which don't exist today, or which should be promoted on a teleworking-dedicated page Work with HR to establish an API feed from ADP so IT can get timely information to react appropriately (such as new hires, transfers, terminations) and determine how best we can monitor content created by people leaving or moving departments (part of governance) Help define the auditing capabilities and reports needed to perform routine audits, for instance, show a site owner/sponsor/stakeholder what content is out of date Design key performance indicator charts and graphs for the entire Document Management Vertical (which includes OnBase, Xpertdoc forms engine, SharePoint) Establish a method for gathering feedback on Sharepoint pages - like report to webmaster style problem reporting or "feedback" link Actively seek out paper processe we can easily automate Help make sure this thing operates lightning fast over VPN Bachelor's degree and/or additional related experience in lieu of degree 1-3 years demonstrated hands on SharePoint Designer 2013 platforms Develop custom web parts and workflows utilizing, but not limited to jQuery, JavaScript, HTML5, CSS3, XML and XMLT meeting and documenting all to customer standards and policies Provide technical expertise to in Microsoft Office (Outlook, Word, PowerPoint, Excel) DoD Healthcare domain experience is a plus Experience working in a DoD environment is desirable Work directly with customers to assist in requirements definition and provide an approved solution that meets customer standards and policies Strictly adhere to established guidelines, processes, and proved solution that meets customer standards and customers to assist in requirements definition and provide an approved solution that meets customer standards and customers to assist in requirements definition and provide an approved solution that meets customer standards and policies Strictly adhere to established guidelines, processes, and provide an approved solution that meets customer standards and customer standards and policies Strictly adhere to established guidelines, processes, and provide an approved solution that meets customer standards and policies Strictly adhere to established guidelines, processes, and provide an approved solution that meets customer standards and policies Strictly adhere to established guidelines, processes, and provide an approved solution that meets customer standards and policies Strictly adhere to Photo Courtesy: shapecharge/E+/Getty Images We all have busy days packed with everything from dentist appointments to the kids' soccer practices to the conference expranded or support multiple formation of proper grammar, sentence syntax, and verb tense) Must be able to demonstrate the ability to coordinate or support multiple formation of proper grammar, sentence syntax, and verb tense) Must be able to demonstrate the ability to coordinate or support multiple formation of proper grammar, sentence syntax, and verb tense) Must be able to demonstrate the ability to coordinate or support multiple formation of proper grammar, sentence syntax, and verb tense) Must be able to demonstrate the ability to coordinate or support multiple formation of the syntax. training, or work experience. Develops system Architecture and system design documentation. Ultimate responsibility for the technical integrity of work performed and deliverables associated with the Systems Engineering area of responsibility for the technical integrity of work performs risk analysis. Track and maintain appropriate project and routine activity metrics acc. Define and develop client-server database structures and related application logic by using MS SQL Server and making use of web services Modify and improve Sharepoint/InfoPath/Nintex driven applications if required and provide support in maintaining the various Sharepoint based Intranets we managed and provide support in maintaining the various sharepoint of the services and entranets we managed intranets and entranets and entranets we managed intranets and entranets and Manage new development projects and collaborate on activities of other (possible) team members to successfully complete these initiatives Establish and follow an appropriate stage-gate style process for new projects. In addition to Java, experience with Node.js, Grunt, React, Twitter Bootstrap, MongoDB, MySQL, Oracle, SQL Server, Less or Sass Responsive Web Design (Media Queries, Flexible Grids etc..), Solr/Elastic esponsive web design, database design, and query optimization is crucial Establishes system information requirements using analysis of enterprise-wide or large-scale information systems. Online calendars let you add these and many other features seamlessly so your templates are personalized to meet your exact needs. Think about what you'll really use, remembering that you can adjus ater. Lend knowledge of assigned application(s) to other members of the technology and business teams to ensure understanding of interrelationships and dependencies. Design, develop and implement the SharePoint environment for creating site templates, list templates, display templates, and other business templates that may be required Coordinate with the Project Manager and stakeholders to gather and document department or major business unit Review and update the SharePoint Governance Plan Participate in the training effort required for the rollout of nplementation support and knowledge transfer with designated IT staff Minimum of 5 years of overall IT experience and 3 years working with SharePoint Minimum of 3 years of experience with .NET technologies Possess excellent business problem solving, design, coding and debugging skills Communicate effectively both orally and in written format in a variety of situations and formats. and deploying SharePoint feature framework solutions Strong skills required in SharePoint 2013 development, NET development, SharePoint 2013 to delivers and Gulp Use of SharePoint 2013 to delivers a nnovative, flexible, integrated solutions to meet customer's changing business needs Develop SharePoint solutions using the .NET Framework with Visual Studio 2013 and SharePoint Designer Adhere to OSC Policies, Procedures, and Practices affecting work products (IIS) and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Designer Adhere to OSC Policies, Procedures, and Practices affecting work products (IIS) and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framework with Visual Studio 2013 and SharePoint Solutions using the .NET Framewo etc) Looking for 5+ years experience Strong knowledge of the built in capabilities of SharePoint 2010, 2013. There comes a time when you just want to get over it, and are no longer writing the resume you actually wanted to. Identifies issues as appropriate Bachelor's degree in computer science or Engineering Three or more years of experience in programming using Java, .NET, MS Access or PL/SQ uld be an asset Customer support experiences would be an asset Basic programming skills Must have 2+ year experience in the following order of importance: SharePoint 2013, Javascript, SharePoint 2013, Javascript, SharePoint 2013, Javascript, SharePoint 2010+, C#. NET 4.0+, .NET Framework 4.0+, Sql Server 2008+, Team Foundation Server 2010+, MS Office 2010+, C#. NET 4.0+, .NET 4.0+, .NE Other technical skills would be helpful- Use of data transfer tools for SharePoint (Ex: Metalogix) & Microsoft VSTO The successful candidate will be able to work on a team remotely and produce SharePoint (ex: Metalogix) & Microsoft VSTO The successful candidate will be able to do this in including SharePoint Designer, InfoPath, Nintex Forms/Workflow, Visual Studio Acquire and apply functional knowledge to execute organizational priorities Market SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop SharePoint capabilities to program stakeholders, including developing presentation materials, communications, and demos/prototypes Identify and pursue opportunities to develop stakeholders, including developing presentation and pursue opportunities to program stakeholders, including developing presentation and pursue opportunities to develop stakeholders, and demos/prototypes Identify and pursue opportunities to develop stakeholders, including developing presentation and pursue opportunities to program stakeholders, and demos/prototypes Identify and pursue opportunities to program stakeholders, and demos/prototypes Identify and pursue opportunities to program stakeholders, and demos/prototypes Identify and pursue opportunities to program stakeholders, and demos/prototypes Identify and pursue opportunities to program s box tools for forms and workflow development Experience with Collabion Charts for SharePoint and other third party tools Experience 3+ years of experience as a SharePoint front-end development and governance processes 5+ years of web-based applications Experience developing SharePoint Solutions with an understanding of the capabilities of Microsoft InfoPath 2010 and SharePoint Designer 2010, Access, 2010, and custom web parts Experience with SharePoint Server 2013 Stakeholder awareness of the benefits of SharePoint Solutions and improve business solutions and improve business processes including the use of Excel 2010, Access, 2010, and custom web parts Experience with SharePoint Server 2013 Stakeholder awareness of the benefits of SharePoint Server 2010 and SharePoint Se to 8 years' experience in a corporate and technical IT environment 3 to 5 years' experience in continuous process improvement and configuration/development lifecycle Excellent reporting skills are critical to construe various technical and business data into a consumable format and involve in conference calls at different time zones to gather information, requirements and involve in coordination to some extent In depth understanding and provide fast response to all major
issues/escalations and concerns in the region Excellent PowerPoint presentation and documentation skills is a must Working knowledge of Sharepoint 2010/2013 is mandatory Working Knowledge of software applications including Microsoft Office Suite (Word, Excel, PowerPoint, Access) Demonstrate EY's core values - integrity, respect and teaming; building relationships based on doing the right thing; energy, enthusiasm and the courage to lead Over 5 years hands on development experience on SharePoint 2013 5-7 years desig rience with a current version of Photoshop, Visual Studio, Sharepoint Designer Responsible developing SharePoint solutions using SharePoint rools and .NET (C#, XML, XSLT, WCF Web services) Develop complex custom SharePoint solutions using SharePoint Tools and .NET (C#, XML, XSLT, WCF Web services) Develop complex custom SharePoint solutions using both SPD and Visual studio Perform Peer reviews, mentor less experienced developers, ensure security standards followed Extensive experience in SharePoint SharePoint Tools and .NET (C#, XML, XSLT, WCF Web services) Develop complex custom SharePoint solutions using SharePoint solutions using SharePoint Tools and .NET (C#, XML, XSLT, WCF Web services) Develop complex custom SharePoint solutions using SharePo Disaster recovery architectures. Upgrades Design and develop complex admin approved InfoPath forms and experience with writing code behind Demonstrated experience in working with a large organization. multi-disciplinary team in a fast paced, technically challenging environment 10+ years of relevant work experience in working with a large organization. and scheduling tasks, and leading status meetings Must have examples of gathering requirements and managing customer expectations successfully Must have ability to work remotely technical support is a must have ability to work remotely technical support is a must have ability to work remotely technical support is a must have ability to work remotely technical support is a must have ability for on-boarding, orientation and technical support is a must have ability to work remotely technical support is a must have ability for on-boarding future work and setting schedules for a local client facility for on-boarding future work and setting future work and setting future work and setting schedules for a local client facility for on-boarding, orientation and technical support is a must have ability for on-boarding future work and setting fut Must have 2+ year experience in the following order of importance: SharePoint Enterprise Edition 2010 and 2013 Apps For SharePoint 2010, C#.NET 4.0, Sql Server 2008, Team Foundation Server 2010 & MS Office 2010 Currently enrolled in a College or University in an computer technology field Experience in automotive industry an asset Sharepoint; Visual Studio, Lotus Notes (Designer), iAuditor, Outlook, Office C+ or C# or C++, .NET and SQL Demonstrated ability to effectively solve problems Well-developed organizational and time management skills Experience in building, developing and supporting all aspects of SharePoint including sites, site collections, master pages & templates, web parts, content types & policies, lists, libraries, workflows, formation of the second state of the second stat authentication, secruity groups and customizations Serve as site/sub-site administrator for multiple SharePoint sites Create functuional design documents, translate the business requirements, and demo solutions Establish and help maintain end user access policy and permissions Provide ongoing support for SharePoint training documents, translate the business requirements into system requirements, translate the business requirements into system requirements into system requirements and demo solutions establish and help maintain end user access policy and permissions Provide ongoing support for SharePoint training documents and establish and help maintain end user access policy and permissions Provide ongoing support for SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple SharePoint training documents are constructed as a site/sub-site administrator for multiple site administrator for multiple site administrator for multiple site a sessions for staff 1-2 years of SharePoint experience MS Excel programming experience and MS Access working knowledge a plus EXCELLENT communication skills Analyze user requirements to derive software into new or modified systems or operating environments Develop or implement algorithms to meet or exceed system performance and functional control of the systems or operating environments Develop or implement algorithms to meet or exceed system performance and functional control of the systems or operating environments Develop or implement algorithms to meet or exceed system performance and functional control of the systems or operating environments Develop or implement algorithms to meet or exceed system performance and functional control of the systems or operating environments Develop or implement algorithms to meet or exceed system performance and functional control of the systems of the systems or operating environments Develop or implement algorithms to meet or exceed system performance and functional control of the systems of the systems of the systems of the system performance environment algorithms to meet or exceed system performance and functional control of the systems standards Develop software solutions by analyzing system performance standards, confer with users or system engineers; and investigate problem areas Modify existing software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Must have active clearance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve its performance Seven (7) years' experience as a Software to correct errors, to adapt to new hardware, or to improve errors, to adapt to e minimum of three (3) years' experience programming in the SharePoint architecture using Share Point Designer and/or SharePoint architecture using Share Point Designer and/or jouery Demonstrated experience programming in JavaSript and/or jouery Demonstrated experience programming in LinkShare Demonstrated experience with Branding nce with Microsoft Access and/or SQL databases 8-10 years of related experience in the areas of infrastructure, middleware, and application development 5+ years of experience using Sharepoint Administrator, Developer and/or Architect Extensive knowledge of SharePoint 2010 and 2013 Experience using Sharepoint as an intranet platform Experience designing and implementing architecture. roadmaps Ability to manage a complex, multi-farm SharePoint environment and scope, design and implement SharePoint solutions Experience optimizing creating custom SharePoint technologies Bachelor's degree or equivalent combination of education and experience and working knowledge of SharePoint Zero years of experience in programming or testing Experience working in a student employment program or related experience 3+ years of software engineering experience in programming or testing Experience working in a student employment program or related experience 3+ years of software engineering experience in program or related experience 3+ years of software engineering experience working in a student employment program or related experience in program or related experience 3+ years of software engineering experience working in a student employment program or related experience 3+ years of software engineering experience in programming or testing Experience working Good analytical and problem solving skills to resolve technical issues Excellent organizational, analytical, written and oral communications skills to effectively Interface with end users and development teams
to conduct systems analysis and planning Knowledge of current Microsoft technology toolsets and methodologies Full project lifecycle from design to mplementation Focus on .NET / SharePoint 2013 / Online and Office 365 / Azure solutions Preferred experience with moving applications to the cloud (MS Azure) Implementation of custom forms, workflows, web-parts and event handlers/receivers Client-side technologies: CSOM/REST, HTML5, CSS, Ajax, JSON, JavaScript (and other frameworks) Server-side scripting and automation with PowerShell Integration with external systems using BCS/Web Services BI/visualization experience is preferred working with Power BI or Tableau Develop internal tools to improve employees work Previous experience with development in SharePoint Experience in .NET (C# or VB.NET business processes Maintain SharePoint resources in compliance with infrastructure requirements Perform SharePoint and MS SQL Server Reporting Services (SSRS) Create queries to provide ad-hoc SSRS reports, analysis, and datasets based on customer and business needs Engage with IT service providers to represent capabilities with regard to the integration of business processes, tools, and documentation into an enterprise system supporting multiple business processes, tools and evaluat launch timelines Experience in application development life cycle, including requirements definition, system design and testing / QA and transition to production Experience using Basecamp, Jira or similar task management tools Fast-learner Experience with Web Programming languages - JavaScript, Jquery Prior experience using Basecamp, Jira or similar task management tools Fast-learner Experience with Web Programming languages - JavaScript, Jquery Prior experience using Basecamp, Jira or similar task management tools Fast-learner Experience with Web Programming languages - JavaScript, Jquery Prior experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management tools Fast-learner Experience using Basecamp, Jira or similar task management task management task management task management task management task or modify complex software systems and components using disciplined software development processes Translating business and technical solutions. More FROM QUESTIONSANSWERED.NET Provide high quality technology solutions that address business needs be developing application within mature technology environments Provide production and technical support Work closely with clients to identify and specify complex business requirements and processes Perform tasks related to identifying and troubleshooting application issues and issues resolution or escalation Perform root cause analysis, communication and client relationship management Promote effective support practices and processes ent Alternative Investments Technology in Investment Management Americas wide daily production status reviews Participate in planning sessions to review significant Global Investments Technology in change events and firm wide events to mitigate potential collisions Represent Alternative esting events Assist with IT Risk related initiatives and processes Coordinate external change events that impact that our environments and applications Assist with ad-hoc projects Minimum 3-5 years of Application Development work experience is a timely and accurate manner Ability to work across functional areas including support, development, and infrastructure Part of a solution development, and infrastructure Part of a solution development team, participating in each phase of the software specifications for requirements and design, review and refine an existing code base, create JavaScript/JQuery extensions Provide troubleshooting technical support for SharePoint; differentiate functional issue from technical issues; resolve production problems and provide production and technical support Identify gaps in processes, opportunities for improvements and automation Maintain a deep knowledge of all out-of-the-box SharePoint features, workflow tools, SharePoint template applications and custom component and Ajax Experience or demonstrated skills based on college/class experience, preferably with roots in software engineering Experience in several front end technologies including: jQuery, Angular.js, Knockout.js and Ajax Experience with MVC design patterns and JavaScript framework Ability to extend or create third party scripting frameworks Proficient with HTML5/CSS3 and understanding for current design trends and best practices Experience with responsive Web Design Knowledgeable of Microsoft SharePoint, Access and Visio) Experience with agile methodologies (scrum, lean, Kanban, etc) Deep understanding of information architecture, taxonomy, content types and their barePoint solutions, web Overseeing projects related to the development of the Company Intranet Site. Just remember that you don't need to fill every bit of blan every bit of space, even if you can delete some of the text later. Customize and Tailor Another great feature of online templates is that they're often fully customizable, meaning you can choose everything from the page layouts to the colors of the full development & implementation Experience integrating Sharepoint, .Net application with SQL Server Will work independently with Collaborative Services federal staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion Assist in designing, developing, managing site content staff while communicating clearly with Contract Management on tasks as they progress through completion and possible redesign of all USPTO SharePoint Staff while communicating clearly with Contract Management on tasks as they progress through complexies and tasks as they progress through complexies and tasks as they progress through communicating clearly with Contract Management on tasks as they progress through complexies and tasks as they progress through communicating clearly with Contract Management on tasks as they progress through communicating clearly with meet agency standards/template Experience leading or co-leading teams on agency Assist in designing, developing, managing site content and capabilities, and assist in providing daily maintenance of the SharePoint site for OPIA Responsible for developing complex SharePoint site for OPIA Responsible for developing complex sharePoint migrating the sharePoint workflows that will require multiple approval levels via federal staff within OPIA organization Assist the SharePoint migrating the shareP OPIA SharePoint site from 2010 to 2013 May be called upon to collaborate with our Graphic Artist in the creation of documentation/QRGs/marketing materials Bachelor's in Information Technology projects or IT sponsored technology projects by projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business issues, contribute to IT business projects by projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with SharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with sharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with sharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with sharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with sharePoint 2013 Comprehend basic to complex business projects by a minimum of 4
years of experience with sharePoint 2013 Comprehend basic to complex business projects by a minimum of 4 years of experience with sharePoint 2013 Comprehend basic to complex basic to complex basic to complex bas complex basic to complex basic to complex basic to translating business needs into understandable requirements Provide client support and consultation for IT issues in a timely manner. Conduct analysis reported in Event Viewer and Performance Monitor Regular review, clean-up, management and configuration of SharePoint accunts and sites documentation for any function performed under any competency as directed Design and develop tools that integrate with commercial applications Design and develop database management systems, image processing, collaborative tools, data manipulation techniques, and directory services Provide the operations and maintenance of operational systems Modify existing software to correct errors, allow it to adapt to new hardware, or to improve its performance Analyze user needs and software requirements to determine feasibility of design within time and cost constraints Consult with systems analysts, engineers, programmers and others to design system and to obtain information on project limitations and capabilities, performance and the programs and software applications to be sure they will produce the desired information and that the instructions so others can understand the program Collaborate with managerial, engineering, and technical personnel to clarify or expansion of existing programs to increase operating efficiency or adapt to new requirements write or contribute to instructions or manuals to guide end users Investigate whether networks, workstations, the central processing unit of the system, or peripheral equipment are responding to a program's instructions 07-09 years w/Bachelors Degree Should have strong skills in the following areas: SharePoint design, SharePoint designer and InfoPath Must have experience as a SharePoint Site Collection Administrator to include experience as a SharePoint design, SharePoint design, SharePoint Site administrator and site collection administrator oint Designer and InfoPath Should have experience developing SharePoint sites, subsites and pages Good oral and written communication skills and analytical capabilities required Ability to work directly with customers to identify, validate, implement and test IT solutions Requires knowledge of SharePoint site collection reporting capabilities work directly with customers to identify, validate, implement and test IT solutions Requires knowledge of SharePoint site collection reporting capabilities Working knowledge of Marine Corps Network and Infrastructure MCNIS) and Marine Corps System Command a plus Must be able to demonstrate writing capability at the intermediate level. It's better to leave some blank space and write down what's most important, like appointments, meetings and other events you know you're likely to forget. rably adjudicated DHS background investigation for continued employment 3 years' experience with .Net or C# development Experience with at least two of the following: HTML and JavaScript coding, CSS, SharePoint 2010, SharePoint ent or working as part of an information management organization Must obtain Security +/8570 certification within the first 30 days of employment DHS EOD at the SCI level preferred Cyber security/IT security professional writing experience desired Ability to design, develop, test, integrate, deploy, and support/maintain scalable web pages and ing Java. This includes alternative ways to inform and entertain via written, oral, and visual media Clerical — Knowledge of administrative and clerical procedures and terminology Telecommunications — Knowledge of transmission, broadcasting, switching, switching control, and operation of 2+ years of experience with working on a software development team of project managers, development team of project managers, developers, or architects 2+ years of experience with SharePoint training, including custom branding and navigation, configuri configuring site collections, and designing security, content type development, and application design Ability to work across the client organization and leadership chains to promote user adoption Ability to demonstrate the persistence to acquire design tools and system support Ability to analyze and communicate technical issues to a non-technical audience Security+ Certification or the ability nths of hire Experience with DoD systems and applications development in an Army environment preferred Experience with integrating SharePoint Microsoft Office technologies, including Excel, InfoPath, Visio, PowerPoint, and Access Ability to identify user functional requirements and develop and maintain client relationships Ability to identify user functional requirements and develop and design prototypes based on client requirements and evelop and design prototypes based on client requirements and develop and maintain client requirements and develop and maintain client relationships Ability to identify user functional requirements and develop and maintain client relationships and design prototypes based on client requirements and develop and design prototypes based on client requirements and develop and maintain client relationships Ability to identify user functional requirements and develop and maintain client relationships and develop and design prototypes based on client requirements and develop Understanding of C#, .NET Framework, and ASP.NET, ADO.NET, VB, HTML, CSS, JavaScript, jQuery, XML, SQL Server, Web Services, security, instrumentation, exception handling, SharePoint branding and support of large, complex, or enterprise-wide solutions Excellent communication skills, technical writing skills, solid presentation skills, problem-solving skills, strong analytical skills, leadership skills, customer servic skills and ability to work independently and as part of a team Experience in .NET web development a plus InfoPath (for building forms that contain more functionality than out-of-the-box SharePoint forms)\* Report Builder 3.0 (for creating customized report templates) Kintex Workflow (for automating SharePoint forms)\* Report Builder 3.0 (for creating customized report templates) Kintex Workflow (for automating SharePoint forms) Kintex Workflow (for automating SharePoint forms) Kintex Workflow (for building forms that contain more functionality than out-of-the-box SharePoint forms) Kintex Workflow (for automating SharePoint forms) Kintex Wor (for custom branding of SharePoint's out-of-the-box functionality) CSS (for custom branding of SharePoint sites) HTML (for custom design of master pages) MetaVis (for managing the migration of content from one site or site collection to another)\*\* Must be able to work closely with CDC manager ver the agency Must be able to answer questions both verbally and written, and must be friendly and open to interruption There are probably other "people" skills that I am not listing, but the point is friendly, outgoing, work well with people at many levels Perform tasks on time and with high level of diligence Support senior management in the development, communication, and execution of the program's senior management in the development, communication, and execution of the program's senior management in the development. strategy Ability to lead software development lifecycle, including analysis, design, configuring, programming, and unit testing for SharePoint authentication SharePoint administrative knowledge Experience migrating SharePoint authentication of different authenticatio methods, including Active Directory Federation Services In-depth understanding of the capabilities of SharePoint 2013, SharePoint 2013, SharePoint 2013, SharePoint 2010 SharePoint 2010 SharePoint 2010, SharePoint 2013, SharePoint 2010 SharePo solutions in proprietary applications (e.g., Airwatch) Keen eye and feel for usability and user experience, including navigation, branding and customization Experience developing apps using SharePoint object Model, client Side Object Model, and the REST API Understanding of a variety of data formats (XML, JSON, CSV, etc.) Analytical skills to discover business es, and design quick and effective solutions Advanced knowledge and experience in RDBMS and SQL (Sybase, Microsoft, Oracle, etc.) Experience in government sector preferred Knowledge of Microsoft Office tools Communication skills for customer outreach and marketing Systems integration skills Demonstrated ability to work seamlessly with contractors of other organizations as well as government staffers Experience with SharePoint migrations Intermediate to expert level proficiency with SharePoint migrations as well as government staffers Experience with SharePoint migrations Intermediate to expert level proficiency with SharePoint Designer, MasterPages, HTML and CSS Working knowledge of Data Center Management Per contract requirements, requires bachelor's degree or equivalent, and five to seven nce SharePoint experience: 3 years Current DoD Secret clearance Experience working with DHA and VA health customers Maintain/upgrade/modify existing applications and connections to / from SharePoint to meet the needs of the customer base and within the guidelines of the customer's information security requirements Assist with SharePoint 2010 farms to SharePoint 2013 Build and maintain SharePoint Online / SharePoint Online / SharePoint Designer and custom InfoPath forms Develop custom client side functionality using jQuery and/or Java Script Establish system parameter pate in SharePoint governance processes around enhancements Resolve outages, monitor production applications and support day-to-day operations of SharePoint conducts research and development and evaluates tools that maybe utilized in current and future SharePoint applications Makes every effort to complete assigned by Supervisor
Brings conflicting issues of the second end of the second e ncluding the ability to present solutions/alternatives and influence the outcome of decisions Must have a BS Degree in Computer Science or related field Must have a three (3) or more years of SharePoint 2010/2013 sites and sub sites, gather user requirements, analyze business processes, and develop, deploy, and test platform for collaboration and as a document repository, transfer knowledge to key business contacts Assist other team members and system owners with the implementation of new SharePoint, resolve production problems, and provide troubleshooting support for SharePoint, resolve production problems, and provide production and technical support Provide expertise in ing to assist business units in meeting strategic objectives with technological innovation Prepare thorough, clear technical and functional specifications; as well as systems documentation prepared by junior development staff Prepare and review assessments, required tasks, estimated time frames and effort for any project estimate Maintain efficient operation of supported and new technology, policies or processes to benefit the organization and improve deficiencies Lead or participate in technical evaluations of vendor software Assist in development, or an equivalent combination of education and experience Requires experience in MVC application design and development support software and hardware platforms This person must possess a very good working knowledge of word processing, spreadsheet and databases This role requires a high aptitude for complex problem analysis and tion requires one to lead or actively participate in technical walkthroughs To fulfill this role one must be capable of quickly learning new technical skills Excellent oral and written communication skills with the ability to effectively present to a target audience are essential. SharePoint 2013 and SQL Server One must have experience in creating custom permission levels, external IDS brokers and in managing SharePoint development with its objects to create solutions (Including CSS and Java script customization.) Must have experience in advanced SharePoint configuration ment techniques that programmatically deploy Site Creation, Site Directories, Site Columns, Content Types, Lists, List views, Versioning, Site Templates, Wiki Sites, Team Sites and Personal Sites, Blogs, Announcements, Navigation, Alerts and RSS Feeds One must have expertise in planning searches by identifying data, rules, filters and scopes. Able to interact with all levels of analysts adors and technical resources throughout the organization Strong problem solving, analytical, multi-tasking, design, coding and debugging skills Experience: At least 6 years of fulltime employment, in an IT-related role Degree. At least 6 years of fulltime employment, in an IT-related role Degree. At least 6 years of fulltime employment, in an IT-related role Degree. environment work on the services working in a .NET development environment work on the services working in a .NET development environment work on the services working in a .NET development environment work on the services working in a .NET development environment working i and workflows Deployment of solutions to implement a corporate intranet, content management and documents and process flow charts Develop standard and custom solutions to implement a corporate intranet, content management and documents and process flow charts Develop standard and custom solutions to implement best practices in planning, design, setup and installation of SharePoint environments Creat int including site collections, sites, master pages/templates, pages, web parts, content types, lists, libraries, workflows and navigation Develop solutions using common tasks that include writing XSLT to customize pages and WebParts, designing InfoPath forms, building workflows, writing code (C#, Visual Basic, XML) to enhance usability of the platform, connecting external data sources l-scale applications Assist the Network Administrator with availability, performance, monitoring and security of the SharePoint site Provide day to day project support for the Intranet and other SharePoint applications Support internal users by troubleshooting and resolving issues reported through the service desk Experience with CSS, HTML and modern design technologies that would be used when rewriting a company intranet Bachelor's Degree in Computer Science with a minimum of 3 year of experience as a SharePoint Developer can be substituted for degree Proficient in designing, developing and deploying solutions for a SharePoint 2013, MS SQL Server 2008, MS InfoPating a company intranet Bachelor's Degree in Computer Science with a minimum of 3 year of
experience as a SharePoint 2013, MS SQL Server 2008, MS InfoPating a company intranet Bachelor's Degree in Computer Science with a minimum of 3 year of experience as a SharePoint 2013, MS SQL Server 2008, MS InfoPating a company intranet Bachelor's Degree in Computer Science with a minimum of 3 year of experience as a SharePoint 2013, MS SQL Server 2008, MS InfoPating a company intranet Bachelor's Degree in Computer Science with a minimum of 3 year of experience as a SharePoint 2013, MS SQL Server 2008, MS InfoPating a company intranet Bachelor's Degree in Computer Science with a minimum of 3 year of experience as a SharePoint 2013, MS SQL Server 2013, MS SQL Server 2013, MS SQL Server 2014, MS Squere Science with a minimum of 3 year of experience as a SharePoint 2017/2010, MS SQL Server 2014, MS Squere Science with a minimum of 3 year of experience as a SharePoint 2017/2010, MS Squere Science with a minimum of 3 year of experience as a SharePoint 2013, MS Squere Science with a minimum of 3 year of experience as a SharePoint 2013, MS Squere Science as a SharePoint 2013, MS Squere Science as a SharePoint 2014, Squere Science as a SharePoint 2014, MS Squere Science as a SharePoint 2014 SharePoint Forms Services, ASP.NET, CSS, MS Visual Studio, SharePoint Designer, and one or more programming languages (C#, VB, XML) Develop to stom solutions on SharePoint 2013, 2016 and Online platforms Process SharePoint Apps development Develop custom solutions on SharePoint Apps development Develop custom solutions on SharePoint Content migration Perform SharePoint Apps development Develop custom solutions on SharePoint Apps development Develop custom solutions on SharePoint Apps development Develop custom solutions on SharePoint Content migration Perform SharePoint Apps development Develop custom solutions on SharePoint Content migration Perform SharePoint Apps development Develop custom solutions on SharePoint Apps development dentifying areas for modification Maintain systems by monitoring, identifying and correcting software defects Assist the business with creating technical specifications and test plans Create user and project related documentation Constantly update technical specifications and test plans Information Technology, Information Science, Management Information Systems, or related field. Identifies, recommends and pursues technology/practices to apply to solution Monitors and oversees the completion and implementation of technical products to ensure success and timeliness. Learn how to get the most out of the free online calendar template you choose by applying these helpful tips. And while we're used to running from task to task in a flurry to get everything done, some of us might never get used to remembering everything work under the required application, prior to commencing work under the contract 2+ years of experience with full software development life cycl activities post university Experience with supporting the Department of Defense (DOD), including in a knowledge management or information management or information management or ganization, usability, and accessibility Possess familiarity with the following Command and Control (C2) Systems Experience programming in .NET, ASP.NET, Classic ASP, SQL, Experience with SharePoint Designer, InfoPath, Web Parts, and workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and drivers and drivers and drivers and control (C2) Systems Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and Workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and Workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and Workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Web Parts, and Workflow creation Experience using JavaScript, jQuery, Silverlight, CSS, HTML/HTML5, Adobe Creative Cloud Microsoft MCPD, SharePoint 2010/2013 Designer, InfoPath, Sha translate those into an appropriate technical solution Design, development and deliver custom SharePoint solutions and components Research, analyze and select technical approaches for solving difficult and challenging development approaches with team members Collaborate as part of arger delivery teams which may include project managers, business analysts, architects, visual designers and change management professionals Experience with SharePoint 2013 App Model development Experience with SharePoint 2013 App Model development Experience with SharePoint 2013 App Model development professionals Experience with SharePoint 2013 App Model development Experience with SharePoint 2013 App or big 4 consulting experience, especially with Microsoft Gold Partners or Big 4 consulting firms PowerShell development Understanding of CSS3 layout principles and techniques Minimum education-Bachelor's Degree Extensive professional experience in a Software Developer role Solid understanding of SharePoint Server 2010 architecture 3 years of ent experience with SharePoint Server (workflows, web parts, and custom pages) 5 years of experience developing in a .NET environment Proficient in C#, SharePoint Server 2010 API, and XSLT) Experience with .NET 4.0 technologies including WCF, WPF, and WF Knowledge of Service Oriented Architectures (SOA) and web services Experience with Agile Development Practices Ability to manage multiple tasks, work in a team environment, understand and be responsive to project needs, and work under tight deadlines Team player and excellent communication skills 5+ years of experience with SharePoint 2010 and 2013 solution development, configuration, or customization 3+ years of experience with .Net or C# development Experience with two of the following: HTML and JavaScript coding, CSS, SharePoint 2013 Web part application, and configuration, InfoPath Designer 2013, SharePoint 2010/2013 Designer, or online workflow development experience with problem solving, business process analysis, and redesign Ability to leverage time management experience with problem solving, business process analysis, and redesign Ability to leverage time management experience with problem solving, business process analysis, and redesign Ability to leverage time management experience with problem solving, business process analysis, and redesign Ability to leverage time management experience with roubleshooting technical issues and presenting well thought-out solutions to clients Experience with Muhimbi 6+ years of experience with troubleshooting technical issues and presenting well thought-out solutions for SharePoint TS/SCI clearance with a polygraph Develop, create and modify SharePoint applications software or specialized utility programs Create different workflows and dashboards, custom ribbon interfaces, and custom forms for collecting data from users Bachelor's degree with a major or concentration in Computer Science. Computer Science, and custom forms for collecting data from users Bachelor's degree with a major or concentration in Computer Science, Computer Scien least two (2) years of SharePoint development experience required At least five (5) years of SharePoint development experience with Share Point Services, and SPServices Functional experience with Share Point Nintex and InfoPath Ability to work independently or in a group setting Good social skills to work effectively in a diverse environment Microsoft Certified Solutions Expert (MCSE) certification preferred 3+ years of experience with SharePoint 2013 solution development, configuration, or customization 2+ years of experience with two of the following: HTML and JavaScript coding, CSS, SharePoint 2013 besigner, or online workflowed and configuration, or customization 2+ years of experience with two of the following: HTML and JavaScript coding, CSS, SharePoint 2013 besigner, or online workflowed and configuration, or customization 2+ years of experience with two of the following: HTML and JavaScript coding, CSS, SharePoint 2013 besigner, or online workflowed and configuration and configurat development Experience with leveraging Azure Experience with leveraging Google Analytics Experience with leveraging Muhimbi Develop SharePoint to connectivity Services Customize business forms using SharePoint, InfoPath, .NET, or Visual Studio Customize workflows using SharePoint solutions including Customize business forms using SharePoint to connect to other systems and/or data sources using SharePoint solutions including Customize business forms using SharePoint solutions including Customize business arty products, or Visual Studio Five years of experience as a SharePoint Developer working with SharePoint 2010 or 2013 Strong experience with Visual Studio and Team Foundation Server Experience developing workflows with 3rd party products Ability to design SharePoint solutions from rough irements Proven development ability in Web technologies, jQuery, HTML5, XML, CSS, IIS, .net, AJAX, Web API, Infopath, Central Admin Perform and oversee basic to complex projects Maintain a thorough functional understanding of the supported application(s) Direct and monitor junior resources coordinating
development tasks on projects Prepare and manage the technical components of project plans Participate with other development staff, operations staff and IT staff in the systems development and testing process Prepare and reviews test data, test scripts. Experience may be substituted in lieu of degree Minimum of 2-5 years' experience in software development and testing process Prepare and reviews test data, test scripts. Experience in software development and testing process Prepare and reviews test data, test scripts. Experience may be substituted in lieu of degree Minimum of 2-5 years' experience in software development and reviews test data, test scripts. Experience may be substituted in lieu of degree Minimum of 2-5 years' experience in software development and reviews test data, test scripts. Experience may be substituted in lieu of degree Minimum of 2-5 years' experience in software development and reviews test data, test scripts. Experience in software development and reviews test data, test scripts, experience in software development, and reviews test data, test scripts, experience in software development, and reviews test data, test scripts, experience in software development, and reviews test data, test scripts, experience in software development, and reviews test data, test scripts, experience in software development, and reviews test data, test scripts, experience in software development, and reviews test data, test scripts, experience in software, experience in softwa nterfaces for Microsoft SharePoint 2013/2016/Online applications and add-ins Develops workflow task and process behaviors, using Visual Studio, SharePoint 2013/2016/Online, JQuery, and .NET framework based business applications Gathers requirements and creates technical design and implementation plans for the SharePoint apps and solutions, including assessment of utilization of SharePoint 2013/2016/Online standard features versus custom development matrix Scopes and estimates resources on the Solution build Designs and development matrix scopes and estimates resources on the Solution build Designs and estimates resources on the Solution build Designs and development matrix Scopes and estimates resources on the Solution build Designs and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and evelopment matrix Scopes and estimates resources on the Solution build Designs and estimates resources on the Soluti Services, Analysis Services, and Integration Services) Participates in Quality Assurance (UAT) process and resolves issues as they arise; meets client requirements by participating in workshops and regular client meetings An associate degree from an accredited college and six years of satisfactory fulltime computer operations experience, one year of which must have been in a project leader capacity or as a major contributor on a complex project; or A four-year high school diploma or its educational equivalent and eight years of satisfactory full-time computer operations experience, one year of which must have been in a project; or Education and/or equivalent to "1", "2", or "3" above. Devising or modifying procedures to solve problems, and codes programs based or effective design following best practices Incooperation with project managers, establishes schedule estimates for implementing proposed technical solutions Maintains a comprehensive knowledge of current and emerging application development tools and technologies Support three major SharePoint web application farms including custom web parts, custom ASP.NET code, and more Work tickets based on SLA and priorit standards Interface with project managers at the client site for engineering, commercial engines program Develop and integrate new features and functionality, or develop managers at the client site for engineering, commercial engines program Develop and integrate new features and functionality. experience using SharePoint and: ASP.Net, C#, HTML, CSS, CAML, AJAX Good working knowledge of VS 2010 and .NET 3.5 to .NET 4.0 framework SSAS Data Cube Modeling Front-end development experience in SharePoint, .NET, web services Extensive experience in SharePoint, .NET, web services Extensive experience in SharePoint, .NET 4.0 framework SSAS Data Cube Modeling Front-end development experience using JavaScript/JQuery, etc Extensive experience in SharePoint, .NET 4.0 framework SSAS Data Cube Modeling Front-end development experience using JavaScript/JQuery, etc Extensive experience in SharePoint, .NET 4.0 framework SSAS Data Cube Modeling Front-end development experience using JavaScript/JQuery, etc Extensive experience in SharePoint, .NET 4.0 framework SSAS Data Cube Modeling Front-end development experience using JavaScript/JQuery, etc Extensive experience in SharePoint, .NET 4.0 framework SSAS Data Cube Modeling Front-end development experience using JavaScript/JQuery, etc Extensive experience using JavaScript/JQuery, etc Extensiv experience is huge plus Provide in-depth and demonstrable understanding of application development and sustainment on the SharePoint 2013 Work with customers and their adoption Need to have an understanding of Air Force Medical Treatment Facility (MTF) business, organizational data structures and their adoption Assist in transitioning legacy programs and data structures onto SharePoint 2013 Work with customers and their adoption Assist in transitioning legacy programs and their adoption Assist in transition advelopment and sustainment on the SharePoint 2013 Work with customers and their adoption Assist in transition advelopment and sustainment on the SharePoint 2013 Work with customers and their adoption Assist in transition advelopment and sustainment on the SharePoint 2013 Work with customers and their adoption Assist in transition advelopment and sustainment on the SharePoint 2013 Work with customers and their adoption Assist in transition advelopment advelopme ives and common MTF challenges Bachelor's Degree and in-depth, proven experience with SharePoint 2013 Security+, Microsoft SQL Server, .Net and Microsoft Certified Professional (MCP), preferred All contractor personnel working on this effort shall have a minimum of ADP-II level of access, as described in DoD 5200.2-R. Performs analysis to translate busineed busineed and in-depth. requirements and demo solutions to key stakeholders Mentors Level I and II SharePoint Developers Creates functional design documentation while meeting all associated guidelines and best practices such as Secure Coding Quality Assurance, Unit Testing Consulting with end users Must work well with others in the team 3+ years experience in building, designing, and configuring SharePoint 7+ years experience building, designing, and Record Centers Advanced development skills in HTML5 (CSS, JavaScript and modern frameworks) and Record Centers Advanced development skills in HTML5 (CSS, JavaScript and modern frameworks). like AngularJS, Jquery) and ASP.NET MVC, modern C# techniques Visual Studio and Team Foundation Services with Release Management Very strong English speaking skills Demonstrated on-the-job experience developing, deploying and supporting SharePoint sites with a mixture of inherited and customized permission groups and roles for sites containing two or more Subsites Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience creating and managing advanced workflows for Enterprise level SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience creating and managing advanced workflows for Enterprise level SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience
assuming responsibility and troubleshooting legacy SharePoint or other websites created by previous development teams Demonstrated on-the-iob experience assuming responsibility and troubleshooting legacy SharePoint as a start of the start of t developing, deploying and supporting SharePoint 2013 sites using languages and tools such as HTML5, CSS, SharePoint Designer, Infopath Demonstrated on-the-job experience developing, deploying or supporting Content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing, deploying content Management Systems (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated on-the-job experience developing (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated (one or more of the following: Joomla, Wordpress or Drupal) Demonstrated (one or more of Management System Demonstrated on-the-job experience working in an Agile software development environment Demonstrated on-the-job experience implementing and enforcing UI, UX and accessibility compliance and best practices Demonstrated on-the-job experience working in an Agile software development environment Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress to Joomla, Sharepoint 2010 to 2013) Demonstrated on-the-job experience with site migration due to platform change or substantial version upgrade (i.e. Wordpress experience with advanced graphic editing and creation using Adobe Creative Cloud or equivalent level professional graphics suite software Demonstrated on-the-job experience creating advanced calendar solutions using SharePoint for multiple users with restricted access controls Demonstrated on-the-job experience implementing custom layout and themes in CMS such as Joomla or Wordpress Analysis, design, development, implementation and support of FAA's mission-critical enterprise Business Application pages, page layouts, etc.) for enterprise Business Application solution Aid the support and development of integration points between the SharePoint solution and external applications, forms, and custom workflow in SharePoint and build dashboard reports Follow SharePoint and build dashboard report SharePoint architecture and solutions Assist in developing and executing SharePoint architectural roadmap and system strategy Establish and administer SharePoint governance plan Participate in business analysis activities to gather required reports and dashboards, created from potentially multiple data sources Participate with other specialist to convert legacy reports to new utilize new data sources and new BI solutions BS degree in Computer Science, Information Systems, or related equivalent 10+ years of proven software development experience in development and reporting, and maintaining solutions using the Microsoft technology stack 5+ years of experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation of scalable, high-performing ASP.NET web applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation applications 5+ years' experience with service-oriented, multi-tier Architecture, and implementation applications 5+ years' experience with service-oriented, multi-tier Architecture, and applications 5+ years' experience with service-oriented, multi-tier Architecture, and applications 5+ years' experience with service-oriented, multi-tier Architecture, and applications 5+ years' experience with service-oriented, multi-tier Architecture, and applications 5+ years' experienc lists, libraries, workflows, forms authentication and security groups Experience with SQL Server Reporting, Analysis and Integration Services (SSIS) and creating custom workflows and knowledgeable of SharePoint Governance, and taxonomy Experience with the Suite of SQL Server Power BI Tools 3+ solutions using different App models and create the appropriate information architecture, taxonomy and solutions using different App models and create the appropriate information architecture, taxonomy and solutions using different App models and create the appropriate information architecture archi SP services and CSOM Ability to deliver technical demonstrations The developer will: Build new pages, microsites, team sites and develop new tools to support internal departments, create slideshows and manage overall site content deployments Ability to work independently to create, test, and maintain a code base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience with Omniture, Google Analytics Experience base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience with Omniture, Google Analytics Experience base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools The developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools and the developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools and the developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools and the developer should have solid problem solving skills, and be able to troubleshoot and fix any issues that arise 3-5 years of total IT experience base for SharePoint tools and the developer solving skills and the developer solving Experience in email template creation Experience with an editorial content based web site Experience using HTML/CSS/JavaScript/jQuery ; C#, ADO.NET, ASP.NET, MVC. Provide implementation/production support as required on occasion in order to meet critical deadlines Estimated Travel - potential of 1 - 2 overnight(s) per month associated with team assignments Legally eligible to work in the United States Experience with XML, HTML, JavaScript, JSON, and CSS preferred Experience with XML entry of the United States Experience with Agile Software Development Methodology preferred Sharepoint 2016 (enterprise version for cloud) Federated search Engine Optimization (SEO)? There is also going to be a migration to 2013 in the near future 2) 4 Years of experience working with JavaScript/Jquery. You might be tempted to include everything, but that can quickly eat up space on the pages and make things difficult to read. Analyze end user data and business needs to format final product and ensure user-orientation of program/system performance. Work with peers, management, and business needs to format final product and ensure user-orientation of program/system performance. Experience with all stages of the Software Development Life Cycle Analysis, design, coding, component/assembly testing of all application code owned by the Application code owned owned by the Application code owned o and implementation, technical and user documentation, software conversions, maintenance (including production support) Strong interpersonal skills with the ability to discuss, negotiate, influence working with cross functional teams responsible for development, delivery and support of IT applications focused on Enterprise Collaboration technologies - SharePoint Strong knowledge of current and legacy SharePoint systems and technologies including SharePoint systems and technologies including sharePoint systems and technologies - SharePoint systems and technologies including sharePoint systems and technologies - SharePoint systems - SharePoint systems - SharePoint systems - SharePoint systems - SharePoint - S technologist roles Advanced SharePoint. .NET and SQL development skills Six Sigma and/or Lean certification/training Industry certifications such as: MCSE, MCSD, MCPD, CCNA, CCNP, CCDA, CCNP, CCA, CCNP,

but prefer experience with 2013 or 2016) 4 years' experience working with SQL Server 2008 R2 and more recent 4 years' experience working with any 3 of the below MS Visual Studio Experience working with SSRS Experience working with any 3 of the below MS Visual Studio Experience working with SSRS Experience working with any 3 of the below MS Visual Studio Experience working with SSRS Experience working with SSRS Experience working with any 3 of the below MS Visual Studio Experience working with SSRS Experience working with any 3 of the below MS Visual Studio Experience working with SSRS Experience working with SSRS Experience working with any 3 of the below MS Visual Studio Experience working with SSRS Experience working with SSR provided by the reporting manager Analyze user needs and designing software solutions Develop and write computer programs to store, locate, and information on a day-to-day basis Customize an already existing SharePoint site for internal use Enhance current SharePoint site and administration functions as needed Provide a range of strategies to identify, create with stakeholders and other organizations ITIL certification, either active or expired Working knowledge of ITE organization certification desired Be a part of a team working on migration project from SharePoint 2010 to 2016 Serve as a recognized technical expert for one or more of our client's major software applications or systems Collaborate with business partners to understand business nee and identify potential technical solutions Design, create, and maintain software by analyzing, testing, assessing and implementing programming applications based on business priorities and guidance to teams and individual software engineers, demonstrating significant creativity and flexibility provides guidance to teams and individual software engineers. and release management Develop feature across multiple subsystems within the portfolio, including collaboration in requirements definition, prototyping, design, coding, testing and deployment Assist teams with quick and reliable debugging and solve the most complicated system issues Demonstrate expert proficiency in fundamental and advanced application development concepts Demonstrate expertise in algorithm analysis and performance tuning assists in the testing process by conducting reviews and analyses, witnessing tests and participating in software certification Knowledge in MS Office automation and procedural documentation and presentation Must be adept of handling multiple projects, with ability to prioritize, meet deadlines and manage changing priorities Proven ability to be flexible and committed to work hard, both independently and in a team environment in a high pressure on-call environment Amendable on graveyard shift 9pm to 5:30am Alabang-based At least 6yrs of experience in heavy web development work role using SharePoint Sound verbal and inication skills Has at least 4yrs of graphical design experience, including usage of PhotoShop and InDesign Knowledge of various codes, such as: HTML, JavaScript, ColdFusion, Flash, Dreamweaver, and Visual Studio NGA customer experience Thorough knowledge of basic web design principles Proficiency with relational database such as: Oracle, MySQL, Sybase, and SQL Server Familiarity with SQL and CGI scripting Experience with Collection Administrator and knowledge of DOD environments Experience with HTML, DHTML, XLST, JavaScript, JQuery, and CSS Experience with SharePoint Designer 2013 Experience with implementing technical solutions using SharePoint Templates ing and reviewing functional or technical design documents and business process maps Ability to translate, develop, and integrate complex business requirements into SharePoint achieves process maps Ability to translate, development Experience with Knowledge Management a strong plus 3+ years of experience with SharePoint achieves process maps Ability to translate, development Experience with Knowledge Management a strong plus 3+ years of experience with SharePoint achieves process maps Ability to translate, development Experience with SharePoint achieves process maps Ability to translate achieves process maps Ability to olatforms, technical architectures, or business applications and products that run on those platforms, beyond that of a Programmer: Candidate is able to work without assistance 3 years of experience in SharePoint Developer/designer solutions including deep technical knowledge of PWA and experience with SharePoint and SOL Server Hands on experience in Control. Document Approval) and templates (EPT. Site. Web) Experience in Microsoft Project/Project-related aspects of SharePoint (BCS. User Project, Pro sites, especially with regard to Project Server integration A thorough understanding of the Project client/server integration Ability to adapt to the changing needs; learn guickly in a complex and dynamic environment desired using Rally as a work management tool Web Parts; Custom Forms; Workflows; Timer Jobs; Web templates; User Interface Experience Enhancements Understanding of Visual Studio and when to code versus configure a solution with out of the box features Intermediate to expert level of light development skills pertaining to XML/XSL, CSS, javascript, jQuery and related technologies Experience building web services/APIs using WCF and Web API Building and supporting customized applications, such as single page apps, SharePoint hosted and Provider hosted add-ins in SharePoint 2013/2016. Experience with jOuery, React, KendoUI, Vue.is or other JavaScript frameworks is desirable Systems implementation skills; requirements/process analysis, conceptual and detailed design, configuration, testing programs/software utilizing the appropriate hardware, database, and development/programming technology. SAP, CRM systems Experience in ASP.NET / MVC / C# .NET / HTLM / CSS / JavaScript / jQuery / REST / OData / MVC / CDN Should be involved in complete SharePoint application deployment life cycle in at least two projects Experience in ASP.NET / MVC / C# .NET / HTLM / CSS / JavaScript / jQuery / REST / OData / MVC / CH .NET / HTLM / CSS / JavaScript / jQuery / REST / OData / MVC / CH .NET / HTLM / CSS / JavaScript / jQuery / REST / OData / MVC / CH .NET / HTLM / CSS / JavaScript / jQuery / REST / OData / MVC / CH .NET / HTLM / CSS / JavaScript / jQuery / REST / OData / MVC / CH .NET / HTLM / CSS / JavaScript / jQuery / REST and writing and writing and writing and documenting of requirements from non-technical business users as well as technical users Support testing and debugging of solutions and components Create functional and technical and technical users as well as technical users Support testing and documenting of solutions using SharePoint as the main platform Participate in the gathering and documenting of requirements from non-technical business users as well as technical users Support testing and documenting of solutions and components Create functional and technical users as well as technical users nent solutions Design, develop, document, and deploy all existing forms of SharePoint solutions and apps Advises on issues of systems integration, compatibility, and multiple platforms Deployed solutions to SharePoint manually and via Power Shell Proactively monitor and SharePoint using SharePoint log files and other diagnostic tools Develop web services to be consumed from SharePoint B.S. in Computer Science, Information systems, or related fields or commensurate work experience 5+ years exp development environment Expertise in programming within the .NET Framework stack of technologies Experience with MVC and modern web development experience with SOAP, WSDL, XSDs, and REST to communicate with web services Advanced development knowledge and experience with the Active Directory, Active Direc Assists in architecting, designing, developing, and SSRS Experience with relational database design principles and technologies (DNS, Load Balancers, Reverse Proxies) Assists in architecting, designing, developing, and deploying custom solutions and SharePoint apps to meet business requirements. digital calendar can send notifications to your email inbox or your smart device, which is especially helpful for getting you rattention if you're immersed in a task that can leave you losing track of time. Often available for free, these tools help you maintain your schedule, stay organized and better anticipate what you need to remember each day to relieve some of the stress that comes along with juggling a busy life. Plus, you'll feel less frazzled having that built-in time when you can pause, regroup and prepare for the next task. Analyzes user's requirements, concept of operations documents, and high level system architectures to develop system requirements, concept of perations documents, and high level system architectures to develop system architectures to develop system requirements, and high level system architectures to develop system requirements, and high level system architectures to develop system requirements, concept of perations documents, and high level system architectures to develop system requirements are concept of perations. related field; or equivalent work experience 1-3 years of proven development/programming/coding experience with designing, building, and maintaining SharePoint development tools Understanding of the 2013 SharePoint App Model Demonstrated basic understanding of the Software Development and processes by a constrainting/development procedures First level knowledge and/or demonstrated technical ability to effectively interact with employees of various positions, departments, and levels of technical ability to effectively interact with employees of various positions, departments and processes and processe Formal training or experience in user interface design and/or user experience design Knowledge of or experience with C# and Service Oriented Architecture 3+ years of
experience with SharePoint 2010/2013 Bachelor's Degree in Computer Science or related field experience Knowledge in Angular]S and Bootstrap Experience with ASP. Net development Tableau knowledge Design and implement large scale enterprise applications using SharePoint 2013, SharePoint On-premise and O365 with application architecture, leverage out-of-the box SharePoint features, custom components and third party tools Establish standard development processes, perform code reviews and conduct unit testing Provide technical expertise in evaluating applicability to business goals and requirements, create prototype solutions, demo and train users Track emerging technologies and evaluating applicability to business goals and requirements and best practices actively participate in the Governance process associated with technology standards Development of new history and further development of existing solutions on the Sharepoint platform, re-engineering and administering (Microsoft SQL Server 2008 \ R2) is considered as an additional advantage SharePoint 2010 developer experience Work through the full life cycle development (starting development, testing and deployment) Experience in SharePoint 2010; out of the box configuration, configuration, configuration design, development using C #, JQuery and asp Good fundamental and hands on knowledge of MS SQL Server 2008 Application design, development and maintenance Experience in custom SharePoint 2010/2013 (starting development) (starting development and SharePoint Online is essential Experience of customizations using Apps Model for SharePoint Designer/SharePoint Designer/SharePoint Designer/SharePoint OOTB Workflows and developing Nintex/K2 workflows Knowledge on coding standards and best practices while identifying solutions An understanding of SharePoint colling the Apps either using C# / VB.Net Basic Knowledge on SharePoint Site administration basic knowledge of service applications like Managed meta data, search, BCS etc Basic knowledge on HTML, CSS3, JavaScript, JQuery, WCF, WPF etcA Legal gualification or work experience is desirable Develop custom solutions on SharePoint 2013 platform Process SharePoint content migration reguests Analyze site usage trends Assist in content management and content governance practices through the use of workflo And the services, and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored procedures, and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored manner Able and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored manner Able and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored manner Able and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored manner Able and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored manner Able and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL, stored manner Able and triggers Practical experience with Visual Studio, SOL Server Fundamental understanding of database concepts, including SOL server Fundament to work independently or collaboratively Self-motivated, fast learner with exceptional follow-through and capable of working independently Analytical and troubleshooting skills, attention to detail and guality to manage workload across multiple fast-paced projects Excellent, demonstrated ability to express complex concepts in verbal and other forms English proficiency and excellent grammatical, writing, and editorial skills are required Bachelor's Degree (or equivalent vears of experience) in related discipline such as Computer Science, Information Systems In-depth and demonstrated skills in written communications, documentation, increase user awareness and provide relevant training materials Familiarity and working knowledge of object oriented programming principles Familiarity and working knowledge of jOuery, CSS, SharePoint 2010, SharePoint 201 Minimum of two (2) years' experience and practical knowledge in supporting large-scale IT systems migration and/or deployment Extremely strong, proficient and demonstrated oral and written communication skills with experience working effectively with senior management team members, and technical staff members regarding communication and training issues Ability to management team members. tasks in a fast-paced environment with competing priorities and quick turnaround deliverables, and exceptional attention to details In depth experience establishing Web presence in support of other large scale IT systems deployment and support of notice scale in support of notice scale in support of notice scale in support of other large scale IT systems deployment and support of notice scale in support equivalent experience (4 years) Minimum of 2 years' experience as a software developer preferably using Microsoft technologies such as Visual Studio Experience using SharePoint Experience explaining system operation and maintain a DOE Q clearance. Requires explaining system operation and processes to resolve problems for users who are generally receptive to the information. The beauty of using a digital calendar is that it's easier to search for and find a new design that's more appealing to you. Document development/programming problems and resolutions for future reference Effectively unit test all code and programs prior to releasing them to the quality assurance team. (file boxes, computer printer) Minimal travel required and must be able to work and back-end SP management.2. Experience with SPD2013 Experience with SSO applications at an enterprise level Experience with SSO applications atabase of the Agile Methodology Preferred current NRC IT-L clearance or ability to obtain NRC IT Level I or higher access Minimum of 6 Years SharePoint experience in the following: Visual Studio 2012, Site Creation, Microsoft Workflow Manager Minimum of 3 years of experience with SQL Server 2008 and 2012 database. technologies The developer will have experience with the .NET Framework and development of web parts Three years or more of relevant experience with InfoPath, Visual Studio and SharePoint Designer applications Experience with MS Office applications Experience with InfoPath, Visual Studio and SharePoint 2010/2013 database Experience with InfoPath, Visual Studio and SharePoint 2010/2013 database Experience with as well as organizational and problem-solving skills Bachelor's Degree in computer related discipline Demonstrated advanced Microsoft Excel skills Weather and/or SBIRS-specific experience with SSIS. Microsoft Sare Point Components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions Design and development of SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions Design and develop solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions Design and develop solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint components (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using SharePoint (web parts, application pages, page layouts, etc.) for enterprise scale Portal and Collaboration solutions using nfrastructure and features such as content types, content migration, master pages, page layouts, site templates, multi-user publishing workflows, and document management Strong understanding of infrastructure and security architecture concepts Ability to successfully facilitate collaboration across multiple functions, departments and levels Track record of consistently driving projects to completion and taking accountability for work and results Ability to effectively and professionally communicate, both orally and in writing Ability to articulate and translate technical language to non-technical customers Personal commitment to quality and on-schedule delivery Required Experience and Skills Bachelor's degree in computer science or related discipline 2 to 4 years' direct experience working with Microsoft SharePoint platforms (2010 and/or 2013) 2 to 4 years' experience in web development, especially ASP, net Strong understanding of SharePoint administration and platform architecture 2 to 4 years' experience in SharePoint administration and platform architecture 2 to 4 years' experience in solution. bint Designer or Visual Studio Ability to work
well on multiple projects with competing and shifting priorities Preferred Experience and Skills Previous experience and Skills Previous experience working within a global technology team General understanding of SharePoin and training materials and training materials and training materials and training users on SharePoint features and functionality Experience developing written procedures for SharePoint applications Developer certification Past or current VA Access Analyze, design, construct and implement new business systems for internal and public facing SharePoint developer certification Past or current VA Access Analyze, design, construct and implement new business systems for internal and public facing SharePoint features and functionality Experience developing written procedures for SharePoint applications Developed applicat SharePoint applications using the ISON, AngularIS and REST services Experience with one or more JavaScript frameworks for SharePoint SPAs 1 year AngularIS Experience with SharePoint API, CSOM, and ISOM K2 Black Pearl, K2 Workspace, K2 Designer experience Creates K2 solution artifacts like workflows (KPRX) and SmartObjects (SODX) within K2 designer Develop forms using K2 Develops code with the various K2 APIs/SDKs to extend the platform and create reusable components Deploys solutions to Production Environment (using K2 package and deploy tool) Install and Configure K2 Develop, execute, and document procedures and standards adhering to SDLC best practices and following agile scrum methodology 1-3 years hands-on SharePoint features and solutions including web parts, master pages, custom page layouts, content types, workflows, and site templates Experience with design, development and deployment of enterprise level portals and collaboration solutions on SharePoint 2010/2013 blatforms using CSOM, JavaScript, jQuery, ASP.NET, C#, power shell scripting, CAML, LINQ, XML/XSLT, HTML5, CSS3, and Bootstrap for Responsive Design Experienced in Sitrion Social Sites configuration and UI customization Performs full lifecycle development of portal solution ncluding planning, prototyping, developing, developing, and maintaining dashboards, web parts, and applications Builds a validation capability to veri data being displayed is trustworthy (matches data sources) and has a monitoring and alert system to identify a data connection source was lost or disrupted Can make full use of existing tools and capabilities to develop high quality, professional dashboards, arranged to collate and display data to facilitate senior leader decision-making to be based on that data Recommends new or revised methods and tools to meet or exceed dashboard requirements High Desirable: Familiarity with BMC Remedy (or other IT service management tools, specifically: SharePoint 2013 Object Model, SharePoint 2013, Visual Studio 2012/2013, MS SQL Server table and query design/usage, jQuer [avaScript, MS SQL, CAML, CSS, C#, .Net, HTML, Microsoft Business Intelligence Tools Has working knowledge of standard debugging tools and SCRUM/Agile development Ability to communicate and work effectively with a variety of government and contractor individual debugging tools and SCRUM/Agile development Ability to communicate and work effectively with a variety of government and contractor individual debugging tools and SCRUM/Agile development Strong problem solving skills with the ability to influence consensus and agreement Ability to influence consensus and agreement Ability to communicate and work effectively with a variety of government and contractor individual debugging tools and SCRUM/Agile development Strong problem solving skills with the ability to influence consensus and agreement Ability to communicate and work effectively with a variety of government and contractor individual debugging tools and SCRUM/Agile development Strong problem solving skills with the ability to communicate and work effectively with a variety of government and contractor individual debugging tools and SCRUM/Agile development Strong problem solving skills with the ability to communicate and work effectively with a variety of government and contractor individual debugging tools and SCRUM/Agile development and contractor individual debugging tools and strong problem solving skills with the ability to communicate and work effectively with a variety of government and contractor individual debugging tools and strong problem solving skills with the ability of government and contractor individual debugging tools and strong problem solving skills with the ability of government and contractor individual debugging tools and strong problem solving skills with the ability of government and contractor individual debugging tools and strong problem solving skills with the ability of government and contractor individual debugging tools and strong problem solving skills with the ability of government and contractor individual debugging tools at all levels Ability to work pro-actively and autonomously; self-starter DoD 8570 Certification - IAT II within 6 months of hire 25% - Develops and/or reviews architecture documents; researches and proposes solutions to architecture documents; researches and proposes solutions to architectural and development reporting 5% - Performs other related ned Working knowledge of source control system (e.g., VSS, TFS, GIT, Subversion) Demonstrated ability to navigate development environment in a variety of ways (e.g., IDE, command line) Ability to leverage standard algorithms and patterns when writing code Adherence to agreed-upon coding and naming conventions. Ability to write software that optimizes leverage of the underlying technologies (e.g., Phusion, TCP, sockets) Demonstrated proficiency in refactoring code and developing reusable functions/objects Ability to write technologies/platforms Ability to design systems that span multiple technologies (e.g., Phusion, TCP, sockets) Demonstrated proficiency in refactoring code and developing reusable functions/objects and support for all of the SharePoint 2010 and 2013 applications Developing, organising and maintaining standard operational procedures (including regular maintenance duties to the SharePoint environment and supporting applications Ensuring business continuity management (BCM) routines are documented, maintained and tested i ed schedule Scoping and developing solutions, or engaging with third parties to develop applications based on requirements and recommend suitable, fit for purposes to interact with central administration Engaging with various business departments (technical and non-technical) within the bet365 group to help gather initial requirements and recommend suitable, fit for purposes to interact with central administration Engaging with various business departments (technical and non-technical) within the bet365 group to help gather initial requirements and recommend suitable, fit for purposes to interact with central administration Engaging with various business departments (technical and non-technical) within the bet365 group to help gather initial requirements and recommend suitable, fit for purposes to interact with central administration Engaging with various business departments (technical and non-technical) within the bet365 group to help gather initial requirements and recommend suitable, fit for purposes to interact with central administration Engaging with various business departments (technical and non-technical) within the bet365 group to help gather initial requirements and recommend suitable, fit for purposes to interact with central administration Engaging with various business departments (technical and non-technical) within the bet365 group to help gather initial requirements and recommend suitable. nternal support for business users, responding quickly to questions and issues as they occur Providing technical consultations as needed, liaising with other teams within the technology domain Supporting integration efforts for SharePoint and other systems to provide process improvements Building requirements ngs, database setup and service account setup usage Recognised SharePoint qualification Appreciation and hands on experience of business continuity principles and processes Experience of SharePoint 3rd party applications such as Ninte supporting SharePoint web development with experience supporting SharePoint 2010 in a multi-server farm enterprise environment Working knowledge of SharePoint architecture patterns, SharePoint designer, InfoPath, and SharePoint technologies (for example exams 70-332, 70-331) or other relevant MS certification Currently possess DoD 8570 IAT Level II baseli ave contification, CompTIA Security+ce or higher Basic understanding of HTML, JavaScript, CSS, XSLT, XML Hands-on experience in supporting multiple OS and environments Familiarity with Business Connectivity Services or basic Business Intelligence as it relates to SharePoint 2013 experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS,
Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience of SQL, IIS, Windows Server 2008 Large Enterprise-level IT experience enterprise-level IT experienc with Microsoft SharePoint 2010 & 2013 Enterprise Version Experience building custom modules including Web Part Development using SharePoint object model, Site Definitions, List Definitions, Custom Content Types, Custom State Columns, Features and Solution Packages Microsoft Visual Studio 2013 or higher, C#, XML, XAML, XSLT, HTML/DHTML, JavaScript (including Jquery), CSS 2/3, .NET Framework (2.0 - 4.5) 2007/2010/2013 Solid understanding of SharePoint Administration with Central Administration Office 365 (highly desirable) MediaRich Bachelor's Degree in programming/systems or computer science, specialized training, Microsoft certification, or equivalent work experience required 5+ years applications development and support experience including 3 years practical experience developing for SharePoint 2007, 2010 technology and experience in supporting systems, applications and databases. The goal is to make your life easier, not add something to it that you dread using. Can start uncleared but must be able to start the clearance process upon acceptance Experience using JQuery, web services, SharePoint, Sha working in an ITIL centered environment Current DOD TS or DOE L/O clearance The candidate will support the Deputy Chief Management Officer (DCMO). Directorate for Organizational Policy and Decision Support (OP&DS) in the Office of Secretary of Defense (OSD) with a portfolio of major Departmental activities to include assisting with tracking, supporting, and/or assessing strategic documents, senior leader decision nentation of organizational adjustments, and institutionalization of management reform initiatives The candidate will serve as a SharePoint Developer with responsibility for evaluating, designing, and developing application software using ASP.NET, SQL Server, Microsoft.NET Framework The candidate will also use in-depth understanding of SharePoint 2010 and 2013, including Windows Workflow Foundation, InfoPath, and Form services, and MS Rights Management to solve technical and business problems SAIC is looking for an individual who has superior analytic, research, and technical skills and who is poisted, articulate, and comfortable working with senior government officials SharePoint and .NET applictions, in order to track strategic actions Candidate duties also include soliciting input from users for upgrades and additional functionality of the tools offered and researching the availability of new tools to assist in better meeting user needs Bachelor's Degree preferred in Computer Science or a related field This position requires 3-6 years experience with the Department of Defense and construct to present difficult concepts in simple terms Extensive background and training in the application of various knowledge management, and the ability to present difficult concepts in simple terms Extensive background and training in the application of various knowledge management, and the ability to present difficult concepts in simple terms Extensive background and training in the application of various knowledge management, and the ability to present difficult concepts in simple terms Extensive background and training in the application of various knowledge management and collaborative tools including MS SharePoint and SharePoint and SharePoint and SharePoint and SharePoint and the ability to present difficult concepts in simple terms Extensive background and training in the application of various knowledge management and collaborative tools including MS SharePoint and SharePoint bility for evaluating, designing, and developing application software Requires demonstrated experience developing, and vide application of technical principles, theories, and concepts in the field Requires demonstrated experience in implement exceptional client service and professionalism while working at the client site Experience with MS Rights Management Ability to work in a dynamic government and to take initiative and work independently as appropriate Ability to prioritize tasks through strong organizational strong interpensional strong interpensional skills with the ability to work in a dynamic government work environment and to take initiative and work independently as appropriate Ability to prioritize tasks through strong organizational strong interpensional skills with the ability to work in a dynamic government work environment and to take initiative and work independently as appropriate Ability to prioritize tasks through strong organizational skills with the ability to work in a dynamic government and to take initiative and work independently as appropriate Ability to prioritize tasks through strong organizational skills with the ability to work in a dynamic government and to take initiative and work independently as appropriate Ability to work as appropriate ability to work in a dynamic government and to take initiative and work independently as appropriate ability to work as appropriate ability t and customization of SharePoint-based solutions for Collaboration portals, Enterprise Content Management, Workflows and Enterprise Search Document detailed design, functional and technical specifications in developing SharePoint solutions Provide though it leadership on best practices for solution design, with a thorough understanding of enterprise application integration including the use of business process and forms, enterprise search, business intelligence, collaboration services, collaborative document management, and portal interaction on mobile platforms Exhibit an understanding of SharePoint architecture and have the ability to design, deploy and support solutions in a shared services architecture Create and execute test plans to ensure guality and adherence to standards Develop, execute, and subjust to handle multiple tasks and meet deadlines Troubleshoot technical issues, perform root cause analysis and take appropriate action to remediate issues, perform root cause analysis and take appropriate action to remediate issues and will mentor, train and foster lower support tiers At least 4+ years hands-on SharePoint Development experience creating SharePoint SharePoint Development experience creating SharePoint and foster lower support tiers At least 4+ years hands-on SharePoint Development experience creating SharePoint Point features and solutions including web parts, master pages, custom page layouts, content types, workflows, and site templates Experience with design, development and deployment of enterprise level portals and collaboration solutions on SharePoint 2010/2013 platforms using CSOM, JavaScript, jQuery, ASP.NET, C#, power shell scripting, CAML, LINQ, XML/XSLT, HTML and CSS Proficiency in SharePoint Site and Central ministration (configuring and managing SharePoint Services, site collection administration, etc.) Working knowledge of related technologies such as: SQL Server, Internet Information Server and Active Directory Proficiency in defining and maintaining Taxonomy Term Store(s), custom content types with the ability to create custom result sources, refiners and display templates for Enterprise SharePoint Search Experience with complete Software Development Life Cycle and iterative development and implementation, effective consulting, time management and analytical skills Designing, development and implementation oug fixing on existing applications Preventative, executing Alfresco/Liferay applications User Support, answ ns of end users and providing guidance in the use of applications when required. This can help you save time later in the week, and it can also get you used to using your calendar, making it a habit. Architects and builds site collections and sites, including development of custom code where needed to meet complex business requirements Applies current SharePoint out-of-the-box features combined with .NET technologies to develop, modif and maintain SharePoint server portals. Candidate must be experienced in utilizing Team Foundation Server and in developing in an agile mode Experience in developing and managing SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience in developing and managing SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience in developing and managing SharePoint 2010 and SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience with SharePoint 2010 and SharePoint 2010 and SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience with SharePoint 2010 and SharePoint 2010 and SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience with SharePoint 2010 and SharePoint 2010 and SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience with SharePoint 2010 and SharePoint 2010 and SharePoint 2013 applications using SAML2, Kerberos, and/or claim token 4+ years of experience with SharePoint 2010 and SharePoint 2010 and SharePoint 2013 applications using SharePoint 2010 and SharePoint 2010 2013 Online & On-Premises configurations of OOB features and Search Rich work experience in developing App/Feature using SharePoint Object Model/CSOM, JavaScript, JQuery, Event Receiver, Creating/ Customizing the Components (Workflow, List, and Library), WSP Creation and Business Connectivity Services Extensive
experience in working with Microsoft SharePoint Server 2013, Microsoft SharePoint Server 2013, Microsoft Technology of Microsoft Technology of Microsoft Technology of Microsoft Technology and SharePoint Server 2013, Microsoft SharePoint Server 2013, Microsoft SharePoint Technology of Microsoft Technology and SharePoint Server 2013, Microsoft Server 2013, Microsoft SharePoint Server 2013, Microsoft SharePoint Server 2013, Microsoft Se stack Good level of experience with SOAP, XML, and SQL with working knowledge of Web Services Good exposure to SharePoint migration tools Highly experienced with office applications, including word-processor, spreadsheet, and presentation software High level of comfort with social software (Yammer) and its APIs Good understanding of top level business strategies and organizational structures Good knowledge on advanced topics like BDC, Excel Web Services, single sign-on, InfoPath, and Form Services will be an added advantage Excellent communication skills with technical and non-technical people Familiarity with Data/Statistical analysis techniques and tools, a plus Understanding of SharePoint security and integration with Active Directory security and integration with Active Directory security groups Basic knowledge of Active Directory and Windows server administration To work independently in the team, delivering full development lifecycle solutions, escalating any issues to the appropriate stakeholder Design and development of new and existing SharePoint Solutions are development of new and existing state of the appropriate stakeholder Design and implementing complex enterprise solutions are development of new and existing state of the appropriate in line with project documentation & ensure projects are scoped according to defined best practice / governance established within the team Conversing with stakeholders throughout the projects Work in team-oriented environment, providing technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members on a broad range of technical expertise and guidance to team members of applications and product development To take part in technical requirement meetings, conference calls, discussion forums and related meetings coordinates creation of visual design and theme for SharePoint applications with other UX teams and business sponsors. To ensure knowledge up-gradation and work with new technologies so that the solution is current and meetings. Ability to balance multiple tasks with demanding deadlines and also being an inquisitive, fast learner Follow policies and procedures like change management, project governance and software configuration management, project governance and software configuration management. effective communicator, one that is confident in their technical abilities and who is able to verbally demonstrate them A free thinker who can bring new ideas to the table and demonstrate them if appropriate To keep up to date on all technologies connected to Microsoft SharePoint Development tools and products Work in cross-functional teams to assess, define, and design a Records Management Strategy for CSB-IT SharePoint sites and this strategy will become a part of the overall CSB IT SharePoint Governance (relies on experience and judgment to plan and accomplish project objectives, which includes successful completion of project phase deliverables, on time, with-in budget, and to the specified guality standards) Develop and implement Strategy Ensure guality standards of business/technical solution through regular checkpoints and reviews Ensure utilizing best practices during both design and deployment Work with platform/infrastructure experts to identify a project solution and a sizing and optimization methodology Provide expertise, lead business/technical meetings, and communicate effectively with different teams and departments Create/update internal procedures for SharePoint training documentation, as needed Maintains competency with respect to the Microsoft development platform, system knowledge, and industry best practices and trends Thorough knowledge of SharePoint 2010 and SharePoint Online (365), including when and how new component/web parts should be developed Thorough knowledge of Microsoft Technologies, especially.NET 3.5; business solutions with MS SQL Developed solutions with MS SQL Developed business solutions with MS SQL Developed business solutions between and records management 3+ years of experience with HTML, CSS, JavaScript Object oriented Coding Solid understanding of MS SQL Developed business solutions with MS SQL Developed business solutions between and records management 3+ years of experience with HTML, CSS, JavaScript Object oriented Coding Solid understanding of MS SQL Developed business solutions with MS SQL De NET development using MS Visual Studios 2008 and 2010 Good understanding of HIPPA Understanding of HIPPA Understanding of what PPI information is, and the rules for handling it 5+ years of experience as a SharePoint development Strong business analysis skills to understanding of what PPI information is, and the rules for handling it 5+ years of experience as a SharePoint development Strong business analysis skills to understanding of HIPPA Understanding of what PPI information is, and the rules for handling it 5+ years of experience as a SharePoint development Strong business analysis skills to understanding of what PPI information is, and the rules for handling it 5+ years of experience as a SharePoint development Strong business analysis skills to understanding of the strong business analysis skills t developer Ability to demonstrate strong attention to detail Possession of excellent organizational skills Bachelor's degree, or equivalent experience with JavaScript Solid understanding of Change Management, Auditing and Security concepts Expertise in SharePoint 3+ years' work experience with JavaScript Solid understanding of Change Management, Auditing and Security concepts Expertise in SharePoint site design and development and Administering SharePoint 2010/2013 Farm Expertise in Ajax controls like Telerik and ASP.NET Ajax controls like Telerik and ASP.NET Ajax controls Proficiency in Web technologies such as WSS, SP 2010 Expertise in Ajax controls like Telerik and ASP.NET Ajax controls like Telerik and ASP.NET Ajax controls Proficiency in Web technologies such as WSS, SP 2010 Expertise in Ajax controls Proficiency in Web technologies such as MSS, SP 2010 Expertise in Ajax controls like Telerik and ASP.NET Ajax controls like Telerik and AS Extensively used InfoPath Form, Custom workflow and Business Intelligence using SSRS, Performance Point Service and Chart WP Expertise in roles and Permission implementation Experience working, Analytics , Backup and Restore On-the-job experience working with SharePoint Experience configuring and maintaining SharePoint sites content and their associated workflows Experience working with an Agile/Scrum environment Prior experience supporting IC customers US Citizenship is required in order to obtain and maintain a TS/SCI w/ Polygraph security clearance Experience working with SharePoint sites content and their associated workflow Develops, stages, tests, and hosts selected SharePoint sites content and their associated workflow Develops, stages, tests, and hosts selected SharePoint sites content and their associated workflow Develops, stages, tests, and hosts selected SharePoint sites content and their associated workflow Develops, stages, tests, and hosts selected SharePoint sites and forms applications sites and forms applications applications application sites and forms applications applications application sites and forms applications applications application application sites and forms applications applicati workflows, page templates, branding customizations, FAST search scopes, and web services with no guidance Creates connections to systems allowing the display of dashboards using components such as Excel, SQL Reporting Service, etc., with no guidance Creates connections to systems allowing the display of dashboards using components such as Excel, SQL Reporting Service, etc., with no guidance 3+ years of experience with SharePoint out The Box and custom solutions Ability to be a Self-starter, multitask in a Fast-paced enviro tasks with minimal supervision Possession of excellent team Oriented, team building, graphics, presentation, organizational, analytical, Problem-solving, and customer service skills Sharepoint SME will be delivering software system development in a complex technical staff, senior managers and peers Leverage excellent problem solving, design, coding and debugging skills Provide attention to performance, scalability, reliability, availability, reliability, availability at the SharePoint 2010/2013 Understand various types of life cycle development including Agile / Scrum lifecycles Strong analytical and problem-solving skills, along with excellent written and oral communication skills Experience working with sharepoint 2010. Providing usage and status reports to keep clients informed about the effectiveness of systems, applications and databases Developing and ing communications to notify users of scheduled upgrades to systems, applications and databases and to inform them of problems and outages Requires knowledge of information technology systems, applications and databases to improve their operating effectiveness. Don't feel like you have to stick with the current template just because you started with it. Investigate, analyze, document, and correct reported defects Create and maintain technical documentation as well as assist with training and related materials as needed Manage/ensure third party software is functioning properly; provide reports if needed Evaluate and adopt new SharePoint technologies as they become available Bachelor's degree in Computer Science. Information Systems: or related discipline 3-5 years' of experience in SharePoint design, development and maintenance Excellent written and oral communication skills with strong technical and non-technical staff Extensive experience in SharePoint design, development and maintenance Experience with SharePoint's Designer, WorkFlow, CSOM, JSOM Microsoft Visual Studio, SQL Server, M SSIS/SSAS/SSRS PowerView PowerPivot Provide Consultation on SharePoint applications Develop electronic forms and workflow to satisfy user requirements New user functionality and data structures are usable and consistent with the overall architecture Functional configuration and development changes are executed robustly and conform with development standards and change processes Administrative and maintenance tasks of the platform are executed timely, proactively and conform with development standards and change processes Administrative and maintenance tasks of the platform are executed timely, proactively and with a high degree of precision and adherence to guidelines High degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of precision and adherence to guidelines High degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and satisfaction by internal stakeholders that a high degree of end-user adoption and statisfaction by internal stakeholders that a high degree of end-user adoption and statisfaction by internal stakeholders that a high degree of end-user adoption adopti the life-cycle for their functional needs is managed in a transparent, collaborative and effective way Plan, lead, and execute SharePoint projects, document requirements, and applications functional areas to define and scope SharePoint 2010 and Web development tasks Gather user requirements, and applications functionality Provide day-to-day operations support and configuration management and scope SharePoint projects, document requirements, and applications functionality Provide day-to-day operations support and configuration management areas to define and scope SharePoint 2010 and Web development tasks Gather user requirements, and applications functionality Provide day-to-day operations support and configuration management areas to define and scope SharePoint projects, document requirements, and applications functional areas to define and scope SharePoint areas to define areas t serve as the POC for differentiating functional issues from technical issues, and resolve technical issues provide guidance in pursuing innovative solutions to achieve client goals and objectives and performing guality assurance reviews on written products to ensure conformance with internal policies and procedures as well as organizational guidance and direction Solicit input from users for upgrades and additional functionality of the tools offered through the communities of interest (COI) and research the availability of new tools internally and externally to assist developers in enhancing and improving the current tool set to better meet the needs of the users Significant experience with SharePoint 2010 solution development, configuration, and/or customization Active TS/SCI clearance required with ability to obtain an EOD clearance 5 things that best sharepoint resume should resume should resume should resume should resume should be the configuration and skills sections and reflect on the value you deliver, and shouldn't be indicative of your diverse vocabulary But, right now, you just have a blank paper ahead of you. But the process of selecting a resume layout has been perfected years ago. Angular, Bootstrap, and .Net
experience also needed This individual should know how to write strong TSQL and PL SQL queries as well against a Microsoft or Oracle back end DB This person must be thoroughly versed in source code management with Team Foundation Server The ideal candidate must know how to write automated test scripts with Selenium 2.0. Proficient in multiple development tools and thorough knowledge of application to clients to resolve to resolve to resolve to the second test scripts with Selenium 2.0. Proficient in multiple development tools and thorough knowledge of application to clients to resolve to the second test scripts with Selenium 2.0. Proficient in multiple development tools and thorough knowledge of application development tools and thorough knowledge of application to clients to resolve to the second test scripts with Selenium 2.0. Proficient in multiple development tools and thorough knowledge of application dev of the solution of highly complex and to meet service delivery agreements. Ensures completed modules provide functionality described by application experts and meet performance quidelines Researches and reviews literature, patents and production of highly complex projects. This includes applying principles, techniques, procedures, and equipment to the design and production of highly complex projects. various goods and services Design — Knowledge of design techniques, tools, and principles involved in production of precision techniques, tools, and models Education and training design, teaching and instruction for individuals and groups, and the measurement of training design techniques, tools, and principles involved in production of precision technical plans, blueprints, drawings, and models Education and Training design, teaching and instruction for individuals and groups, and the measurement of training design. production, communication, and dissemination techniques and methods. There are roughly 80,000 Sharepoints jobs available now - with more than 500,000 qualified Sharepoint professionals across the US. Be flexible and willing to engage in a little trial and error to find the calendar that meets your needs. \*\*\* Working at a computer or desk (Considerations: Sitting, Eyes, Hands) 75% An inside office environment (Considerations: Closed quarters, lighting, and temperature fluctuations) Needs to be able to work well with and support co-workers and clients Normal hours are Monday - Friday 7:00am - 4:00pm Regular attendance is necessary and required Must be compliant with DoD 8570 and possess a Sec + or higher security certification Providing technical and operational advice and guidance to support clients' information technology infrastructure and applications. Problems in providing technical and operational support, and resolving users' problems may have unusual and unexpected causes. How to select the best resume layout for your SharePoint resume? This candidate will be making changes and developing the look and feel of the SharePoint sites Assist theorem of the SharePoint sites Assist theorem of the SharePoint sites assist theorem of the SharePoint sites and unexpected causes. customer with developing SharePoint sites that enable effective communication with stakeholders Migrate multiple sites to SharePoint 2013 and fully support custom workflows during the transition by developing a test plan Make appropriate recommendations for message/information development, communication method selection, and timing of updates Maintain and update office websites across multiple networks of the organization's online offerings Bachelor's Degree and a minimum of 7-10 years of experience in website content is current, accurate, and reliable Utilize and or modify on-line applications as needed for use by customer components to collect, review, analyze and collaborate on office information requirements contribute to the customer's efforts to enhance the appeal of the organization's online offerings and collaborate on office information requirements contribute to the customer's efforts to enhance the appeal of the organization's online offerings and collaborate on office information requirements contribute to the customer's efforts to enhance the appeal of the organization's online offerings and collaborate on office information requirements contribute to the customer's efforts to enhance the appeal of the organization's online offerings and collaborate on office information requirements contribute to the customer's efforts to enhance the appeal of the organization's online offerings. development, with a background in SharePoint Solutions team to design, build, enhance and update SharePoint sites according to customer requirement entities according to customer requirement. Candidate will work with customer leaders and users to define requirements, create specifications, develop SharePoint web sites, InfoPath AngularIS Client Product Development 3-5 vears technical experience Design, code, modify, and evaluate Microsoft, NET and SharePoint solutions in support of Crowe's strategic objectives Perform Full Systems Life Cycle, (plan, design, develop, test, implement, and maintain) effectively Devise logic and technical procedures Perform coding and tests/debugs applications and programming documentation Build solutions and programming documentations and programming documentation Build solutions and programming documentation Build solutions and programming documentation Build solutions and programming documentations and programming docum Develop estimates and completes assignments on time and within budget Conduct research, advises on new technology, and evaluates alternative solutions Provide third level application support for portfolio of internal SharePoint applications Bachelor's Degree in Computer Science, Information Technology, or related field Minimum of 5 years of experience in designing, developing, configuring, and implementing diverse enterprise applications with diverse solutions using the Microsoft Technology Stack and the .Net framework Minimum of 3 years of experience with SharePoint 2010 (or later) Solution development Knowledge of Transact SQL (T-SQL) syntax and database development Minimum of 3 years of experience with SharePoint 2010 (or later) Solution development Knowledge of Transact SQL (T-SQL) syntax and database development on SQL Server Strong interpersonal and communication skills; able to interact effectively with people from many different disciplines Solid logic and problem-solving methods Willing to develop and maintain skill set and product knowledge to maximize value and to deliver quality services to our customers Profes onal self-starter; strong organizational and follow up skills Able to project a professional image and strong business acumen during cus ner interactions Estimate an annual average of 5 to 10% overtim Respond to all inquiries and issues in a timely manner as the developed code/program moves through the testing process and ultimately into production. It helps to set aside a block of time on your calendar to manage your to-do list. Guides system development and implementation planning through assessment or preparation of system as the development and implementation planning through assessment or preparation of system as the development and implementation planning through assessment or preparation of system as the development and implementation planning through assessment or preparation as the development and implementation planning through assessment or preparation of system as the development and implementation planning through assessment or preparation of system as the development and implementation planning through assessment or preparation of system as the development and implementation planning through assessment or preparation as the development and implementation planning through assessment or preparation as the development and implementation planning through assessment or preparation as the development and implementation planning through assessment or preparation as the development and implementation planning through assessment or preparation as the development and implementation planning through assessment or preparation as the development as the de Government regarding Systems Engineering technical considerations and for associated problems, issues or conflicts. However, all candidates must have at least a four-year high school diploma or its educational equivalent and the four years of satisfactory full-time experience as described in "1", "2", or "3" above Bachelor's degree in Computer Science or related field from an accredited institution Must have prior CDC experience A minimum of 5 years of experience as SharePoint Developer A minimum of 1 year of experience in CSS, JavaScript / JQuery and HTML A minimum of 1 year of experience with Nintex Workflow 2013; Nintex Workflow 20 Development of InfoPath Forms, Workflows (WWF), custom controls, application pages and integration and is in charge of providing technical integration and is in charge of providing technical integration and support for WABCO's SharePoint Portal environment He / She will be in touch with the Service Delivery Manager and understand the requirements from the business and support/create IT solutions which are used world wide Taking part in the New projects Handling technical Support & Maintenance and ensure service availability of SharePoint Portal environments for all new changes for technical and business Any graduate or equivalent by experience Minimum 5 to 7 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in migration, integration & deployment to Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS
SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS SharePoint 2013/Office 365 (Online) Must have 2-3 years of experience in MS Share Must have experience in configuration, operation and maintenance of SharePoint 2013/Office 365 (SharePoint online) Working experience with SharePoint 2010 solution, or customization, or custom following: HTML and JavaScript coding, CSS, SharePoint 2010 Web part application and configuration, InfoPath Designer, or online workflow development and publishing support for existing sites based on SharePoint 2010/2013 Provide SharePoint development support for a new complex solutions using out of the box SharePoint functionality Experience integrating Microsoft Office with SharePoint Strong development skills in .NET Framework, including C#, Web Services and XML Understanding of the SharePoint security model Understanding of SharePoint Best Practices in content management and taxonomy A "can-do" customer focused attitude Office 365 / SP in the Cloud experience working in cloud environments 5-6 years' experience with Microsoft SharePoint Designer - preferred experience with Record Center configuration 4-5 years' experience with Record Center configuration 4-5 years' experience with SharePoint Designer Best Practices 3 - 4 years' experience with Record Center configuration 4-5 years' experience with SharePoint Designer Best Practices 3 - 4 years' experience with Record Center configuration 4-5 years' experience with Record Center configuration 4 maintaining SharePoint Document Libraries, Document Sets and lists; as well as detailed security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with C#, HTML and JavaScript Must behave to obtain a security + quickly 5+ years experience with the security + willing and able to obtain Microsoft Certified Solution Developer (MCSD) Must be eager to learn and must be able to adapt quickly 5+ years of SharePoint Experience maintaining documentations and training materials Engaging with various stakeholders to understand the scope of projects Working closely with development and project support teams Ensure process compliance Provide Daily / Weekly update on progress of work Shows respect for people and their perceived need and wants Good negotiation skills and conflict handling skills Demonstrates and requires integrity and "fair play" in every aspect of the job Builds and develops co-operative and mutually beneficial internal relationships across level, geography and business line for the benefit of the global business Works with others to be an effective team Good Documentation skills (Quality, Clarity and Concise) Define, document, and enforce SharePoint standards, policies, procedures, and business areas, analyze customer requests to determine needs, and recommend, design and implement solutions based on detailed requirements. using SharePoint standard functionalities and needed customizations Schedule projects according to agency priorities Develop and execute in-depth test plans, including end-user training such that most business areas are able to administer by themselves (grant user permissions and manage content) Research and recommend technologies and tools to increase cost effectiveness, integrations, usability, and future expandability of SharePoint administration and development with strong knowledge of SharePoint administration and later versions 3 - 5 years experience with ASP.NET, VBScript, HTML, CSS, JavaScript, jQuery, XML, SQL Server, Web Services, and exception handling Experienced in both Waterfall and Agile development methodologies Developed and implemented best practices, and exceptional troubleshooting skills and able to quickly assess complex problems Must be compliant with DoD 8570 and possess An Active Security + or higher security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Possess An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Posses An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Posses An Active Security Clearance and SSBI Ability to obtain CAC card is required \*Candidates Must Po supporting Portal Applications 2) Experience within SharePoint 2013 doing Web Parts and workflows; (Designer) 4) Must have Security + and a Public Trust clearance Bachelor's degree and 2+ years or an Associate's Degree/Diploma in a computer related field plus 4 years work-related experience; or the equivalent combination of education, technical certifications or training, or work/military experience. Experience must be specific to working on knowledge management projects including web layout enhancements, web- based applications, and be able to work with team members to gather, review, and process deliverables in a timely manner Excellent communication skills, the desire to succeed, consistency, an eye for detail, proven follow-up skills, and an open, team-oriented, positive attitude are crucial components of this position. The candidate must have documented experience and working sharePoint 2010/2013 platforms, SharePoint 2010/2013 platforms, SharePoint and internet/intranet technologies, IIS, SQL, and Windows networking – including SharePoint Designer, SharePoint Workspace, and master templates Proficiency with Microsoft Office suite, including Project and Visio MCP or equivalent Certification MCTS SharePoint Certification MCTS SharePo JavaScript, JQuery (or related libraries) and CSS3/HTML5 Experience with 3rd party products Bamboo, HarePoint development or IT-related skills Bachelor's QL Server certification
MCSD: SharePoint development or IT-related skills Bachelor's Applications Microsoft SQL Server certification Associate degree 2 years of SharePoint development or IT-related skills Bachelor's knowledge management, how SharePoint fits together, governance forums, etc Sound understanding of knowledge management, how SharePoint fits together, governance forums, etc Sound understanding of knowledge management, how SharePoint fits together, governance for the sharePoint fits together, gov knowledge of the .NET framework (C#) and associated technologies Strong knowledge of Development/Admin CSOM, REST, CAML; Creative Suite: Photoshop, Illustrator, Dreamweaver, Fireworks; .NET & MVC Web Development/Admin CSOM, REST, CAML; Creative Suite: Photoshop, Illustrator, Dreamweaver, Fireworks; .NET & MVC Web Development; Database Management, SQL; HTML/HTML5; CSS2/CSS3; JavaScript, jQuery, AngularJ; JSON, JavaScript, jQuery, JSON, JavaScript, jQuery, JSON, JavaScript, jQuery, JSON, JavaScr Office Development Experience with Web Services (WCF) Ability to integrate with a team and work well with others Creative and strong customer-oriented mindset Ability to present and clearly understand and articulate technology issues, initiatives, and the pro/cons of alternatives Experience in government Contracting environment Knowledge of CDC culture, mission, and IT environment Microsoft SharePoint Certification a plus Experience working with Agile (Scrum) project team development environments Support upgrade from SharePoint 2010 to 2016 as needed Project coordination Managing tasks to a schedule Adhering to milestones and deliverable requirements gathering to milestones and deliverable requirements gathering Application design, development, testing, implementation and documentation Microsoft SharePoint 2010, 2016 Developing SharePoint Solutions\Apps in 2013/2016/SharePoint Online farms Strong proficiencies using Bachelor's degree in a related technical area (MCP/MCSD) or equivalent hands-on experience. Performs necessary quality assurance activities to ensure optimum site functionality Experience working with VS .Net 2013 development environment ASP.NET using C# Experience working with VS .Net 2013 development environment ASP.NET using C# Experience developing with AJAX, JQuery and JSON 5+ years of recent software development experience with Agile software life cycle processes, design reviews and implementations SharePoint Client-side development. external Scheduling tool); ability to select the most optimal scheduling solution; ability to select the most optimal scheduling scheduling solution; ability to select the most optimal scheduling solution; ability to select the most optimal scheduling to call SSIS jobs from the command line and from the Scheduling tool locally or remotely Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear understanding of SSIS and ETL best practices within a MS SQL Server environment Ability to create ETL specifications, unit, and system integration test cases Clear
understanding of SSIS and ETL best practices within a MS SQL Server e related certifications (MCITP, MCSE, MCDBA, VCP, etc.) a plus Triage incoming production support requests Communicate with internal customers to resolve issues Configure webpart applications Write unit tests to avoid defect recurrence Provide and implement ideas for improving quality of existing code and streamlining future maintenance Stay up-to-date on new Office 365 offerings (Video Portal, Delve, Sway, etc.) and be able to address inquiries regarding use and functionality from F5 users Serve as a subject matter expert on SharePoint with core external information repositories Deploy and maintain enterprise search center in SharePoint Online, including integrating with non-SharePoint databases Implement SharePoint-based workflows, custom master pages Collaborate with analysts, project managers and others to understand business requirements or defects Develop code in accordance with stated standards and quality measures Write unit tests and participate in functional, integration and regression testing when needed Maintain and create new application documentation Ensure adherence to SDLC and secure web development Be a partner in improving all aspects of our team and organization as a whole Strong knowledge of common web security exploits and preventive measures required Experience with XSLT, Perl, Python, Java and other common technologies preferred Experience with and/or understanding of Lean and Agile methodologies preferred Experience with and/or understanding of unit testing highly preferred Expected to be able to apply strong analytic thinking and trouble-shooting skills to a variety of situations Must be able to apply strong analytic thinking and trouble-shooting skills to a variety of situation of unit testing highly preferred Expected to be able to collaborate and thrive in a fast-paced high-performance environment 4-6 years of experience in website design and development BS/BA in Computer Science or related field or equivalent work experience Development of the internal solutions based on SharePoint platform Handling requirements for enhancements or development of new solutions and future strategies regarding sharePoint Design and architecture Maintenance and by to day maintenance An academic educational background Few years of experience in the following technologies: SharePoint, JavaScript, C# i ASP.NET Knowledge of MS-SQL Knowled you can't change what's on those pages. Assisting other department staff with the design, evaluation, testing and implementation of components of more complex systems. Applications and databases and to monitor hardware, applications and databases. A willingness to learn is critical Proven experience in developing Sharepoint Online & Sharepoint 2013 solutions is a requirement Knowledge about the Web Services architecture of Sharepoint and how to interface from external apps is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 solutions for Sharepoint 2013 is a requirement Advanced experience with Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a requirement Knowledge about the Web Services architecture of Sharepoint 2013 is a req and knowledge of computer systems and programming methods. We did the hard work for you. C# and ASP.net will be used to create customized aspects of the applications specific to what the customer to gather requirements that they will need to create solutions for where they are able to interact directly with the customer to gather requirements that they will need to create solutions for where they are able to interact directly with the customer to gather requirements that they will need to create solutions for where they are able to interact directly with the customer to gather requirements that they will need to create solutions for where they are able to explain how/why it needs done that way Proficiency in .NET, PowerShell, SQL, HTML, CSS, JavaScript, and SharePoint APIs Experience with PowerShell Experience developing SharePoint APIs Experience in developing List Definitions, Site Templates, MasterPages Experience developing SharePoint APIs Experience developing SharePoint APIs Experience in developing List Definitions, Site Templates, MasterPages Experience developing SharePoint APIs Experience developing SharePoint APIs Experience developing SharePoint Service Applications Development of Nintex Workflow to support Global Business Processes Provide assistance in troubleshooting advanced performance issues with SharePoint Working with the Content Consumers, Project Managers and Business Analyst to understand business Intelligence Environments Bachelor's Degree in Information Technology or related field of study from an accredited college or university 3+ years of IT Experience in a SharePoint BI Development or BPM related role Proficient with Microsoft Visual .Net, C# and/or Development Skills Experience with building & support SQL Server Proven track record of using advanced IT systems to solve real world problems with an emphasis on a general understanding of IT systems Experience supporting a Business Process Management Initiative for a global manufacturing company preferred Ability to construct and modify InfoPath forms Microsoft Windows Server Administration with a focus on IIS configurations Unit testing applications and developing system and user documentation Ability to play a highly proactive, participative role when working across teams, demonstrating and promoting cooperation Serve as Technical Lead on SharePoint upgrades Confer with internal customers to gain understanding of needed changes or modifications of existing solutions or SharePoint functionality Develop test plans and software documentation to support new releases and code modifications Serve as the technical lead on upcoming SharePoint migrations/upgrades, performing assessments of current customizations and any necessary remediation activities Assist other Solution Architects in providing SharePoint solutions Develop and maintain programming/interface standards are in use Assist with the evaluation and deployment of 3rd party software Experience with HTML 5 / CSS 3, XML/JavaScript Experience with SharePoint API, CSOM, and JSON Net framework exposure including C#, ASP technologies K2 Black Pearl, K2 Workspace, or K2 Designer experience/JQuery, and Knockout is a plus Troubleshoot production problems related to software applications Research, test, build, and coordinate the conversion and/or integration of new products based on client requirements Design and develop new software products or major enhancements to existing software Evaluate effectiveness of current SharePoint solutions Address problems of systems integration, compatibility, and multiple platforms Consult with project teams and end users to identify application requirements Perform feasibility analysis on potential future projects to management Assist in the evaluation and recommendation of application software packages, application integration and testing tools Resolve problems with software and responds to suggestions for improvements and enhancements Participate in development of software user manuals and technical reports Build and configure additional SharePoint environments and enhancements configuration, or customization Experience with SharePoint 2010 Designer, online workflow development SharePoint 2010 or later, Visual Studio 2012/2013, MS SQL, CAML, CSS, C#, .Net, HTML, Microsoft Business Intelligence Tools 1-3 years demonstrated hands on SharePoint 2010 Designer, online workflow development a must (including customized code, maintaining/creating web parts, and maintaining/creating workflows) Solid understanding of SharePoint and SharePoint and concepts in SharePoint and concepts and policies US Citizenship required for this DoD program and ability to obtain a Secret clearance if necessary Provide support for multiple SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to
maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as necessary to maintain their site collections Experience in migration of SharePoint sites for Joint Staff Directorates within classified military networks Resolve customer issues as ne SharePoint Designer Create documented for deployment, design, specification, test case documents for all projects worked on Ability to develop training documents for users to train on SharePoint and its functionalities and typical day to day use Security+ with CE A current operating system certification Experience with supporting the branding and customization of SharePoint 2007, 2010, or 2013 sites Experience with SharePoint security and permissions concepts Experience with advanced .NET and ASP.NET development Ability to collaborate with sharePoint security and permissions concepts Experience with SharePoint and applications Experience with advanced .NET and ASP.NET development Ability to collaborate with sharePoint security and permissions concepts Experience with advanced .NET and ASP.NET development Ability to collaborate with sharePoint security and permissions concepts Experience with advanced .NET and ASP.NET development Ability to collaborate with advanced .NET and appropriate IT staff to implement SharePoint security and permissions concepts Experience with advanced .NET advanced

software development for Web applications Bachelor's degree, preferably in Computer Science, Information Technology, Computer Engineering, or related IT discipline or equivalent years of relevant 3+ years of experience designing and developing SharePoint Designer Experience automating business processes and writing SharePoint workflows Experience creating custom forms using SharePoint Designer and/or Microsoft InfoPath Must have strong desire to learn new skills, works well in a team environment and also helps with all aspects of SDLC Willing to live and work in the Orlando, FL area 1) 5-7 years of experience as a SharePoint Developer 2) Experience creating customized workflows with Nintex and forms 3) Experience working independently as a Sr. Developer- this role will be customer facing Design, plan, implement, and periodically evaluate and enhance system architecture for public health surveillance and related projects Work with the stakeholders to define key capabilities and performance requirements besign and Technology aspects of the system in accordance with customer specifications Ensure requirements are met and evaluates performance with customer Responsible for software development, operational requirements, hosting, SQL server databases and system performance to keep up with changing requirements Will perform project manager Participates of and exploring and developing and developing and developing and developing and developing content to reduce the program (systems, personnel, and data). Works with other team members, report and issues programming solutions, and ensure that identified solutions and distributed computing solutions for the customer Monitors performance to identify and help resolve system problems Investigates and resolves problems on selected software products and standard systems.
